

risk of mortality from gas bubble disease. For modification 1, USGS requests an annual take of juvenile, endangered, artificially propagated, upper Columbia River steelhead (*Oncorhynchus mykiss*) and an increase in the annual take of juvenile, ESA-listed, Snake River spring/summer chinook salmon associated with the scientific research. ESA-listed fish will be acquired from the SMP (under the authority of a separate permit) at Lower Monumental, Ice Harbor, or McNary Dams; transported as necessary to Ice Harbor Dam; surgically implanted with radio transmitters; released at Ice Harbor Dam; and tracked electronically between Ice Harbor and McNary Dams. USGS requests indirect mortalities of ESA-listed juvenile fish, and requests that Modification 1 be valid for the duration of the permit which expires on December 31, 1999.

USGS requests modification 1 to permit 1036. Permit 1036 authorizes USGS annual takes of adult and juvenile, threatened, Snake River fall chinook salmon and juvenile, threatened, Snake River spring/summer chinook salmon associated with a study designed to determine the post-release attributes and survival of hatchery and natural fall chinook salmon in the Snake River. For modification 1, USGS requests annual takes of adult and juvenile, endangered, naturally produced and artificially propagated, upper Columbia River steelhead and juvenile, threatened, Snake River steelhead associated with the research. Also for modification 1, USGS requests an increase in the takes of ESA-listed species associated with two new studies. Study 1 is designed to predict the effects of reservoir drawdown on juvenile salmonids and their predators. Study 2 is designed to collect data to characterize the size, age structure, and growth of salmonid predator populations in free-flowing river reaches. USGS proposes to collect ESA-listed fish using beach seines and/or electroshocking, handle and release them while seeking northern squawfish (*Ptychocheilus oregonensis*) and smallmouth bass (*Micropterus dolomieu*) in the Snake River and the Hanford Reach of the Columbia River. USGS requests indirect mortalities of ESA-listed juvenile fish, and requests that Modification 1 be valid for the duration of the permit which expires on December 31, 2001.

To date, protective regulations for threatened Snake River steelhead under section 4(d) of the ESA have not been promulgated by NMFS. This notice of receipt of applications requesting takes of this species is issued as a precaution

in the event that NMFS issues protective regulations that prohibit takes of Snake River steelhead. The initiation of a 30-day public comment period on the applications, including their proposed takes of Snake River steelhead, does not presuppose the contents of the eventual protective regulations. Those individuals requesting a hearing on any of the above applications should set out the specific reasons why a hearing would be appropriate (see ADDRESSES). The holding of such a hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in the above application summaries are those of the applicant and do not necessarily reflect the views of NMFS.

*I. Background*

The information contained in the AmeriCorps\*VISTA Project Progress Report is used to periodically collect information from project sponsors and site supervisors, and on activities listed in an approved application. In the past the form has, for the most part, collected quantitative information based on the goals and objectives of the approved application work plan.

*II. Current Action*

The Corporation seeks to renew the revised AmeriCorps\*VISTA Project Progress Report. The need to update the form is necessary to gather information on the impact and quality of the change a project makes within a community. Currently, with the form gathering quantitative information, quality and impact are frequently not mentioned by the reporting project. Although impact is not a new focus of AmeriCorps\*VISTA projects, the process of systematically documenting these effects is.
