Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639-7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Seleda Perryman, Assistant CDC Reports Clearance Officer, 1600 Clifton Road, MS-D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Projects

1. TB in Children (0920-0400)—Extension—National Center for HIV, STP, and TB Prevention—As a result of

the rise of tuberculosis among children, CDC sponsored a Workshop on TB in Children a few years ago. Recommendations from the workshop included the need for further research concerning the epidemiology of TB in children, including children co-infected with HIV, improved diagnostic technologies, and the infectiousness of TB in children in health care settings. A contract with Columbia University (to study children in New York City) and with the University of California, San Diego (to study children in San Diego) was approved in December, 1996. The contract consisted of three Modules. Module II, Studies of the Diagnosis of TB in Children, was canceled in December, 1997 due to a lack of participant response. Module III, Reducing the Risk of Nosocomial Transmission of Tuberculosis in Pediatric Settings, has completed data collection and the results are being analyzed. Data collection for Module I, Epidemiology, Magnitude and Risk Factors for TB in children, including HIV-infected Children, was not completed within the original OMB timeframe. This is mainly due to the recent decline in TB incidence in children experienced in the last year in the two study areas.

Data collection will need to be completed for Module I. The data collected to date is not useful because the numbers are too small to be statistically significant to meet the study objectives.

Estimated cost to respondents and government: The costs of epidemiologists working on the contract will be \$100,000. This is included in the total cost of the contract which is \$1.8 million.

Clinicians will interview parents of pediatric TB cases and controls. We have estimated a payment of \$10 per hour of parents time for the interviews. The costs are estimated as follows:

- (a) Positive TST's—\$10 @ hr. divided by 3 multiplied by 100=s \$333.33
 - (b) Negative TST's—\$10 @ hr. divided by 3 multiplied by 200=s \$666.67
 - (c) Source case—\$10 @ hr. divided by 2 multiplied by 150=s \$750.00
- Total cost is: \$1750.00.

Respondents	Number of respondents	Number of responses/respondent	Average burden/response (in hrs.)	Total burden (in hrs.)
Positive Tuberculin Skin Tests (TST's)	100	1	0.333	33
Negative TST's	200	1	0.333	68
Source Case	150	1	0.5	75
Total				176
