If implemented, the TROA will modify operation of five Federal and two non-Federal reservoirs to facilitate distribution of water in the Truckee River basin and implement the congressional allocation of Lake Tahoe, Truckee River, and Carson River waters between the States of California and Nevada. The provisions of the TROA would also create opportunities for:

- Increased municipal and industrial drought water supplies in the Truckee River basin;
- Enhanced spawning flows for endangered and threatened Pyramid Lake fishes;
- Enhanced river habitat for local fish populations by increasing seasonal

releases from Lake Tahoe, Prosser Creek Reservoir, Donner Lake, Independence Lake, and Stampede Reservoir;

- Increased recreational opportunities at upper Truckee River basin reservoirs; and
- Improved seasonal Truckee River water quality downstream from Reno, Nevada.

All comments sent to the Bureau of Reclamation will be compiled for consideration by the U.S. Fish and Wildlife Service and the California Department of Water Resources, as well as the Bureau of Reclamation.
