

site evaluation design uses a two-tiered data collection and analytic strategy to collect information on (1) the organization and delivery of training, and (2) the impact of training on participants' knowledge, skills and abilities. Information about the organization and delivery of training will be collected from trainers and staff who are funded by these cooperative agreements hence there is no respondent burden. All training participants will be asked to complete a

brief (5 minute) satisfaction questionnaire. Trainees attending sessions longer than 3 hours long will be asked to complete 10-minute pre-post-test evaluation questionnaires. Trainees attending sessions longer than 8 hours and a sample of their supervisors will also be asked to complete 5-minute follow-up evaluation instruments. CMHS intends to fund between 6 to 8 education sites under the Cooperative Agreement for Mental Health Care Provider Education in HIV/

AIDS Program II. Each site will serve an estimated 3000 to 3300 trainees over 3 years. The average time requirement for participants across all sessions is expected to be 12 minutes. A pre-test of the evaluation instruments and design will be completed in 4 sites with no more than 9 respondents. Modifications to the evaluation design and instruments will be made as based on results from the feasibility study.

	Number of respondents	Average responses per respondent	Average time per respondent (minutes)	Total time burden (hours)	Annual burden (hours)
Trainees .....	26,400	1.5	12	7,920	2,640
Supervisors .....	2,640	1	5	220	73
Total .....	29,040	.....	.....	8,140	2,713

\* Based on 8 sites funded for 3 years serving a maximum of 1,100 trainees per year. Number of respondents is estimated based on sites conducting 60% of sessions being 3 hours or less, 30 percent of sessions between 3 and 8 hours long and 10 percent of sessions greater than 8 hours long.

Comments are invited on: (a) whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.
