

Rules and Regulations

Federal Register

Vol. 63, No. 76

Tuesday, April 21, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

7 CFR Part 301

[Docket No. 97-102-2]

Mediterranean Fruit Fly; Removal of Quarantined Area

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the Mediterranean fruit fly regulations by removing the quarantined area in Los Angeles County, CA, from the list of quarantined areas. The quarantine was necessary to prevent the spread of the Mediterranean fruit fly to noninfested areas of the United States. We have determined that the Mediterranean fruit fly has been eradicated from this area and that restrictions on the interstate movement of regulated articles from this area are no longer necessary. As a result of this action, there are no longer any areas in California quarantined because of the Mediterranean fruit fly.

DATES: Interim rule effective April 16, 1998. Consideration will be given only to comments received on or before June 22, 1998.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 97-102-2, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comments refer to Docket No. 97-102-2. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday except holidays. Persons wishing to inspect comments are requested to call

ahead on (202) 690-2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Mr. Michael B. Stefan, Operations Officer, Domestic and Emergency Programs, PPQ, APHIS, 4700 River Road Unit 134, Riverdale, MD 20737-1236, (301) 734-8247; or e-mail: mstefan@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The Mediterranean fruit fly, *Ceratitis capitata* (Wiedemann), is one of the world's most destructive pests of numerous fruits and vegetables. The Mediterranean fruit fly (Medfly) can cause serious economic losses. Heavy infestations can cause complete loss of crops, and losses of 25 to 50 percent are not uncommon. The short life cycle of this pest permits the rapid development of serious outbreaks.

The regulations in 7 CFR 301.78 through 301.78-10 (referred to below as the regulations) restrict the interstate movement of regulated articles from quarantined areas to prevent the spread of Medfly to noninfested areas of the United States. In an interim rule effective on October 16, 1997, and published in the **Federal Register** on October 21, 1997 (62 FR 54572-54574, Docket No. 97-102-1), we added a portion of Los Angeles County, CA, to the list of areas quarantined because of the Medfly and restricted the interstate movement of regulated articles from that quarantined area.

We have determined, based on trapping surveys conducted by the Animal and Plant Health Inspection Service (APHIS) and California State and county agency inspectors, that the Medfly has been eradicated from the quarantined area in Los Angeles County, CA. The last finding of Medfly thought to be associated with the infestation in Los Angeles County, CA, was October 6, 1997. Since that time, no evidence of infestation has been found in this area. We are, therefore, removing Los Angeles County, CA, from the list of areas in § 301.78-3(c) quarantined because of the Medfly. As a result of this action, there are no longer any areas in California quarantined because of the Medfly.

Immediate Action

The Administrator of the Animal and Plant Health Inspection Service has determined that there is good cause for

publishing this interim rule without prior opportunity for public comment. The portion of Los Angeles County, CA, affected by this document was quarantined to prevent the Medfly from spreading to noninfested areas of the United States. Because the Medfly has been eradicated from this area, and because the continued quarantined status of Los Angeles County, CA, would impose unnecessary regulatory restrictions on the public, immediate action is warranted to relieve restrictions.

Because prior notice and other public procedures with respect to this action are impracticable and contrary to the public interest under these conditions, we find good cause under 5 U.S.C. 553 to make it effective upon signature. We will consider comments that are received within 60 days of publication of this rule in the **Federal Register**. After the comment period closes, we will publish another document in the **Federal Register**. It will include a discussion of any comments we receive and any amendments we are making to the rule as a result of the comments.

Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

This interim rule amends the Medfly regulations by removing an area in Los Angeles County, CA, from quarantine for Medfly. This action affects the interstate movement of regulated articles from this area. There are approximately 613 small entities that could be affected, including 2 farmers' markets, 2 community gardens, 31 distributors, 4 food banks, 529 fruit sellers, 4 growers, 30 nurseries, and 11 swapmeets.

These small entities comprise less than 1 percent of the total number of similar small entities operating in the State of California. In addition, most of these small entities sell regulated articles primarily for local intrastate, not interstate movement, and the sale of these articles would not be affected by this interim rule.

Therefore, termination of the quarantine in Los Angeles County, CA, should have a minimal economic effect on the small entities operating in this area. We anticipate that the economic

impact of lifting the quarantine, though positive, will be no more significant than was the minimal impact of its imposition.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 7 CFR Part 301

Agricultural commodities, Incorporation by reference, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, 7 CFR part 301 is amended as follows:

PART 301—DOMESTIC QUARANTINE NOTICES

1. The authority citation for part 301 continues to read as follows:

Authority: 7 U.S.C. 147a, 150bb, 150dd, 150ee, 150ff, 161, 162, and 164-167; 7 CFR 2.22, 2.80, and 371.2(c).

§ 301.78-3 [Amended]

2. Section 301.78-3, paragraph (c), is amended by removing the entry for California.

Done in Washington, DC, this 16th day of April 1998.

Charles P. Schwalbe,

Acting Administrator, Animal and Plant Health Inspection Service.

[Docket No. 98-018-1]

Brucellosis in Cattle; State and Area Classifications; Georgia

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Interim rule and request for comments.

SUMMARY: We are amending the brucellosis regulations concerning the interstate movement of cattle by changing the classification of Georgia from Class A to Class Free. We have determined that Georgia meets the standards for Class Free status. This action relieves certain restrictions on the interstate movement of cattle from Georgia.

DATES: Interim rule effective April 21, 1998. Consideration will be given only to comments received on or before June 22, 1998.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 98-018-1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737-1238. Please state that your comments refer to Docket No. 98-018-1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue, SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690-2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. R.T. Rollo, Jr., Staff Veterinarian, National Animal Health Programs, VS, APHIS, Suite 3B08, 4700 River Road Unit 43, Riverdale, MD 20737-1231, (301) 734-7709; or e-mail: rrollo@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

Brucellosis is a contagious disease affecting animals and humans, caused by bacteria of the genus *Brucella*.

The brucellosis regulations, contained in 9 CFR part 78 (referred to below as the regulations), provide a system for classifying States or portions of States according to the rate of *Brucella* infection present, and the general effectiveness of a brucellosis control and eradication program. The classifications

are Class Free, Class A, Class B, and Class C. States or areas that do not meet the minimum standards for Class C are required to be placed under Federal quarantine.

The brucellosis Class Free classification is based on a finding of no known brucellosis in cattle for the 12 months preceding classification as Class Free. The Class C classification is for States or areas with the highest rate of brucellosis. Class B and Class A fall between these two extremes. Restrictions on moving cattle interstate become less stringent as a State approaches or achieves Class Free status.

The standards for the different classifications of States or areas entail (1) maintaining a cattle herd infection rate not to exceed a stated level during 12 consecutive months; (2) tracing back to the farm of origin and successfully closing a stated percent of all brucellosis reactors found in the course of Market Cattle Identification (MCI) testing; (3) maintaining a surveillance system that includes testing of dairy herds, participation of all recognized slaughtering establishments in the MCI program, identification and monitoring of herds at high risk of infection (including herds adjacent to infected herds and herds from which infected animals have been sold or received), and having an individual herd plan in effect within a stated number of days after the herd owner is notified of the finding of brucellosis in a herd he or she owns; and (4) maintaining minimum procedural standards for administering the program.

Before the effective date of this interim rule, Georgia was classified as a Class A State.

To attain and maintain Class Free status, a State or area must (1) remain free from field strain *Brucella abortus* infection for 12 consecutive months or longer; (2) trace back at least 90 percent of all brucellosis reactors found in the course of MCI testing to the farm of origin; (3) successfully close at least 95 percent of the MCI reactor cases traced to the farm of origin during the 12 consecutive month period immediately prior to the most recent anniversary of the date the State or area was classified Class Free; and (4) have a specified surveillance system, as described above, including an approved individual herd plan in effect within 15 days of locating the source herd or recipient herd.

After reviewing the brucellosis program records for Georgia, we have concluded that this State meets the standards for Class Free status. Therefore, we are removing Georgia from the list of Class A States in
