

agencies. Ultimately, we envision that ES would be available for all of the constituent DOT agencies; although at this time, not all have fully consolidated into the DMS. To ensure the quality of the product developed, DOT is evaluating its internal needs as well as those of the general public. Substantial changes to the DMS business processes and procedures and to agency filing requirements may be needed.

This notice is intended to inform the public about, and to solicit public comment on, electronic submission and any necessary changes to our filing requirements. It may be downloaded from the DMS Web Site News Page located at <http://dms.dot.gov> by clicking on the News Link. The questions are intended only to elicit any thoughts and ideas you may have on the ES enhancement to DMS.

User-System Interaction

1. What is your current use of DMS?
2. What capabilities would you like to see in the ES system?

3. Are there any other systems that you use now or are aware of that we should look at in developing ES?

4. What method should DMS use to send/receive information using ES? For example, e-mail, dial-in, Netscape, Internet Explorer, etc.

5. Should the DMS notify you that your document has: (1) arrived; and (2) been accepted?

6. In case the document is rejected, what information should the DMS send back to the submitter? (e.g., time of submission, reason for rejection).

7. Should the DMS provide submitters with an electronic submission form to fill out with information such as organization, docket id, name and address, point of contact, etc.? Filling out such a form could take some time, but could ensure better accuracy. The DMS staff would file the submitter's information as submitted rather than entering it into a record upon receipt, possibly incorrectly.

Document Size and Format

1. How many pages are in the largest documents you have ever submitted?

2. How many documents do you submit on average each day? Each month?

3. What word processing software do you use to prepare your documents? (e.g., Word Perfect (WP), Microsoft Word, etc.)

4. What charts or graphics software does the DMS need to accommodate? (e.g., Power Point, Harvard Graphics, Corel Draw, Freelance.)

Document Date and Time

1. Would you find it useful if you were able to submit documents outside normal business hours?

Security

1. Should the DMS require a unique login id/password to submit a document electronically?

2. Do you have a need to submit comments anonymously?

3. If so, how could the DMS staff contact you in case your submission is incomplete or additional information is needed?

4. Is it important that the DMS validate the identity of the sender of a document?

5. Should ES allow for encryption in order to protect the contents of a document during submission?

General

1. Are there any other special needs that we should consider?

2. Are there any additional capabilities the ES system should have?
