POLICY JUSTIFICATION

Taipei Economic and Cultural Representative Office (TECRO) in the United States - Navigation and Targeting Pods

The Taipei Economic and Cultural Representative Office (TECRO) in the United States pursuant to P.L. 96-8 has requested a possible sale of 28 sets of PATHFINDER/SHARPSHOOTER navigation and targeting pods, integration of the pods with the F-16A/B aircraft, flight testing, personnel training and training equipment, special test sets and support equipment, publications and technical data, U.S. Government and contractor engineering and logistics personnel services, spare and repair parts, maintenance support of repairable material and other related elements of program support. The estimated cost is \$160 million.

This possible sale is consistent with the United States law and policy as expressed in Public Law 96-8.

The recipient will use these navigation and targeting pods on its F-16A/B aircraft to provide a low altitude navigation and targeting capability. Taiwan will have no difficulty absorbing these navigation and targeting pods into its inventory as part of the F-16A/B aircraft program.

The possible sale of this equipment and support will not affect the basic military balance in the region.

The prime contractor will be the Lockheed Martin Corporation, Orlando, Florida. There are no offset agreements proposed to be entered into in connection with this potential sale.

Implementation of this possible sale will not require the assignment of any additional U.S. Government personnel in-country; however, it is estimated that five contractor representatives will be required in-country to provide technical support for approximately three to six months following delivery of the pods.

There will be no adverse impact on U.S. defense readiness as a result of this possible sale.
