

data elements that will be the foundation for future regulated and unregulated contaminant occurrence data reporting. The data submitted using these data elements will provide the basis for the Administrator to determine whether or not to regulate contaminants in the future. For chemical contaminants, a series of meetings have been held with a diverse group of EPA, state, public water system, public health, consumer, and environmental groups, which identified a number of data elements that should be considered for reporting. The majority of the data elements are already in the structure of the EPA Safe Drinking Water Information System (SDWIS). A preliminary categorization of the remaining data elements indicates that some could be dropped because of potential duplication with other data elements, others could be derived from other data elements in the SDWIS structure, and the rest are new data elements. The new data elements are principally focused on: quality assurance, representativeness of the sample, laboratory information, sample location, and well information.

Additionally, the meeting will address such issues as:

1. What specific data element standards should be used?
2. How will electronic reporting by States, public water systems and/or laboratories best be accomplished?
3. What electronic platform(s) should be used to support the NCOD, recognizing public access as a major consideration in data base design?
4. What options for data retrieval should be considered?
5. In what ways will EPA use the data?
6. How should the data be analyzed?
7. What information should be available to the public?

The public is invited to provide comments on the issues listed above or other issues related to the National Drinking Water Contaminant Occurrence Data Base during the February 12–13, 1998 meeting.

Dated: January 21, 1998.

#### SUPPLEMENTARY INFORMATION:

#### Electronic Availability:

##### Internet

Electronic copies of this document and the PR Notice are available from the EPA Home Page at the Federal Register - Environmental Documents entry for this document under "Laws and Regulations" (<http://www.epa.gov/fedrgrstr/>).

##### Fax on Demand

Using a faxphone call 202-401-0527 and select item (6107) for a copy of the PR Notice.

#### I. Purpose

The purpose of the PR Notice is to announce that liquid chemical sterilant products intended for use on critical or semi-critical medical devices are no longer regulated as "pesticides" by the Environmental Protection Agency (EPA), but as "medical devices" under the regulatory authority of the Food and Drug Administration (FDA). For the affected liquid chemical sterilants, EPA will no longer follow the procedures described in the Memorandum of Understanding (MOU) between EPA and FDA signed on June 4, 1993 and amended on June 20, 1994. The goal of this notice is to clarify the authorities of FDA and EPA as they apply to liquid chemical sterilants, thereby increasing the efficiency of regulatory processes affecting these products.

#### II. Applicability

The PR Notice applies to all manufacturers, formulators, producers, and registrants of liquid chemical sterilant products intended for use on critical or semi-critical medical devices, and to products with subordinate disinfectant claims, such as tuberculocidal or virucidal claims, which support a high level disinfectant use pattern for critical or semi-critical devices.

#### III. Contents of the PR Notice

This notice informs registrants of liquid chemical sterilant products how to ensure that their products remain in compliance with FIFRA requirements where FIFRA still applies, and how products no longer regulated under FIFRA will be treated by EPA. In particular, the affected products will no longer be permitted to bear both FDA- and EPA-regulated claims. This notice supersedes all provisions of PR Notice 94-4 with respect to liquid chemical sterilants, but retains the provisions of PR Notice 94-4 that apply solely to general purpose disinfectants.
