SUPPLEMENTARY INFORMATION:

I. Abstract

The Southeast Fisheries Science Center is proposing to change the procedures that will be used to monitor the commercial quota for red snapper in the Gulf of Mexico. Under the authority of 50 CFR 622.5, dealers that are selected to report will have to submit a form with the purchases that were made during each 7 day period the season is open. These forms will have to be submitted to the Center within two working days after each weekly reporting period. Under the existing procedures, NMFS port agents contact dealers to collect the weekly landings

data. This change is necessary to provide more complete documentation on the quantity of red snapper that are caught by fishermen with commercial red snapper endorsements. By submitting a signed form, dealers will provide verifiable data on the landings that are counted towards the commercial red snapper quota.
