General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts." This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at 1-800-363-2068.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing

Office, Washington, D.C. 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arrange by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 16th day of October 1998.

Margaret J. Washington,

Acting Chief, Branch of Construction Wage Determinations.

BILLING CODE 4510-27-M

LIBRARY OF CONGRESS**Copyright Office**

[Docket No. RM 98-6]

Cable Compulsory License: Specialty Station List

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of filings, request for comments.

SUMMARY: The Copyright Office is publishing a list of stations listed in affidavits sent to the Copyright Office in which the owner or licensee of the station attests that the station qualifies as a specialty station in accordance with the Federal Communications

Commission's (FCC) definition of specialty station in effect on June 24, 1981. Any party may file with the Copyright Office an objection to an owner's claim of specialty station status.

DATES: Comments must be received November 23, 1998. The effective date of the annotated list will coincide with the beginning of the accounting period that starts after the publication of the final list in the **Federal Register**.

ADDRESSES: If sent by mail, submit an original and two copies to: David O. Carson, General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. If hand delivered, bring the document to: Office of the General Counsel, U.S. Copyright Office, James Madison Memorial Building, Room LM-403, First and Independence Avenue, S.E., Washington, D.C. 20559-6000.

FOR FURTHER INFORMATION CONTACT:

David O. Carson, General Counsel, or Tanya M. Sandros, Attorney Advisor,

Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Telephone (202) 707-8380 or Telefax (202) 707-8366.

SUPPLEMENTARY INFORMATION: Under the cable compulsory license, section 111 of the title 17, United States Code, a cable operator may carry the signal of a television station classified as a specialty station at the base rate rather than at the higher 3.75% rate that is usually incurred for the carriage of a non-permitted signal. 37 CFR 256.2(c). Specialty station status is determined by reference to the former regulations of the Federal Communications Commission (FCC) which defined a specialty station as "a commercial television broadcast station that generally carries foreign-language, religious, and/or automated programming in one-third of the hours of an average broadcast week and one-third of the weekly prime-time hours." 47 CFR 76.5(kk) (1981). The FCC no longer determines whether a station qualifies as a specialty station; however, the Copyright Office updates the list periodically, because the list remains relevant to the cable compulsory license scheme.

The Copyright Office published its first specialty station list in 1990 under a procedure which allowed the owner of the station to file an affidavit with the Office attesting to the fact that the station's programming comports with the 1981 FCC definition, and hence, qualifies it as a specialty station. 55 FR 40021 (October 1, 1990). The Office agreed at that time to update the list approximately every three years.

Accordingly, on August 4, 1998, the Copyright Office published a notice asking the owner, or a valid agent of the owner, to file a sworn affidavit with the Copyright Office stating that the station's programming satisfies the FCC's former requirements for specialty station status. 63 FR 41599 (August 4, 1998). In response to the notice, the Copyright Office received affidavits on behalf of forty-nine broadcast television stations. These stations are listed below. Any party that objects to another party's claim to specialty station status should submit specific and factual comments as to which station(s) he or she objects to, and why. A final annotated list of specialty stations including references to any objections filed against a particular station owner's claim will be published in the **Federal Register**.

Copyright Office licensing examiners shall refer to the final annotated list in examining a statement of account where a cable system operator claims specialty station status for a particular station. If

a cable system operator claims specialty station status for a station not on the published final list, the examiner determines whether the owner of the station has filed an affidavit since publication of the list. Affidavits received after the publication of the final annotated list shall be kept on file in the Licensing Division of the Copyright Office. Any interested party may file an objection to any such late-filed affidavit and the objection shall be filed together with the corresponding affidavit.

BILLING CODE 1410-31-U

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-461]

Illinois Power Company; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. NPF-62 issued to Illinois Power Company (IP, or the licensee) for operation of the Clinton Power Station (CPS), located in DeWitt County, Illinois.

The proposed amendment requests deferral of the next scheduled local leak rate test for valve IMC-042 until the seventh refueling outage.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

(1) The proposed change does not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed change revises Technical Specification (TS) 5.5.13 to permit deferral of the leakage rate testing of primary containment penetration IMC-042 until the seventh refueling outage. Analyzed accidents are considered to be initiated by the failure of plant structures, systems, or components. The potential for increased leakage through primary containment penetration IMC-042 is not itself a condition that is or could lead to an initiator of any analyzed accident. The proposed change will not alter the operation of or otherwise increase the failure probability of any plant equipment whose failure could initiate an analyzed accident. As such, the probability of occurrence for a previously analyzed accident is not significantly increased.
