

stakeholders needed to effectively develop or implement the project

- Demonstrated ability to reach target audiences through media, outreach and collaborative efforts
- Ability to integrate these efforts with existing programs/campaigns
- Potential for continuing the effort beyond federal support

Additional Items of Interest

- The limited amount of “seed money” is clearly insufficient to accomplish the goals of the overall initiative. In the final selection process, priority will be given to those who indicate a clear ability to undertake the initiative and commit resources beyond those provided through the federal partners. Participation as a Demonstration Community will clearly require a commitment of human as well as financial resources.
- Potential Demonstration Communities are encouraged to consider integrating this initiative into other ongoing public education efforts. Other potential funding sources could include the Congestion Mitigation and Air Quality Improvement Program (CMAQ), the Transportation and Community and Systems Preservation Pilot Program (TCSP) under the Transportation Equity Act of the 21st Century, the annual Mobile Source Outreach Assistance Competition (limited to designated state and local air management agencies) and other funds obtained to conduct transportation/air quality public education activities.
