

Paper Work Reduction Act of 1995. Others represent an update to the methodologies used to estimate burden in the ICR. EPA intends to examine how the UIC program could assist in reducing the burden on the States for reporting requirements and will be working with selected State officials as we work on this renewal. Any recommendations from the underground injection control community and the general public on this issue will be given consideration by the Agency.

### Underground Injection Control Program Hazardous Waste Land Disposal Restrictions; Petition for Reissuance of an Exemption—Class I Hazardous Waste Injection Wells, E.I. du Pont de Nemours & Co., Inc. (DuPont)

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of final decision on the exemption reissuance.

**SUMMARY:** Notice is hereby given that a petition for the reissuance of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to DuPont, for the Class I injection wells located at the Victoria, Texas facility. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by DuPont, of the specific restricted hazardous waste identified in the petition, into the Class I hazardous waste injection wells at the Victoria, Texas facility until December 31, 2000, unless EPA moves to terminate the exemption under provisions of 40 CFR 148.24. As required by 40 CFR 148.22(b) and 124.10, a public notice was issued on December 1, 1997. The public comment period closed on January 15, 1998. All

comments have been addressed and have been considered in the final decision. This decision constitutes final Agency action and there is no Administrative appeal.

**DATES:** This action is effective as of February 11, 1998.

**ADDRESSES:** Copies of the exemption reissuance and all pertinent information relating thereto (including EPA's response to public comments on the exemption reissuance proposal) are on file at the following location:

Documents discussing some or all of these topics may be the subject of future formal reviews by the Science Advisory Board/Drinking Water Committee. Topics that the Committee will be briefed on include: (a) Complex mixtures and their implications to safe drinking water, (b) microbial/disinfection byproduct research and the Agency's plans for tracking research progress, (c) the EPA drinking water contaminant occurrence data base, and (d) the results of new drinking water epidemiology studies conducted in California.

*For Further Information:* Single copies of the background information for this review, or the meeting agenda, can be obtained by contacting Mr. Thomas O. Miller, Designated Federal Officer for the Drinking Water Committee, Science
