Request for Public Comments on Proposed Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

The proposed collection of information described below has been submitted to the Office of Management and Budget for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information may be obtained by contacting the Bureau's clearance officer at the phone number listed below. Comments and suggestions on the proposal should be made within 30 days directly to the Desk Officer for the Interior Department, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 and to the Bureau clearance officer, U.S. Geological Survey, 807 National Center, 12201 Sunrise Valley Drive., Reston, VA, 20192, telephone (703) 648-7313.

Specific public comments are requested as to:

1. Whether the collection of information is necessary for the proper performance of the functions on the bureaus, including whether the information will have practical utility;
2. The accuracy of the bureau's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
3. The quality, utility, and clarity of the information to be collected; and
4. How to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other forms of information technology.

Title: General Knowledge of Natural Resource Policies in southwestern Colorado and northern New Mexico and General Knowledge of Natural Resource Policies in southeastern Utah.

OMB Approval Number: New Collection.

Abstract: Understanding institutional processes is an important component of ecosystem management. The authorities, policies, and practices of local, state and federal agencies and how those policies are perceived by the public greatly affects the way people interact with ecosystems. Yet, for most ecosystems there is no comprehensive understanding of the numbers, functions or effects of these factors. This is particularly true of southern Colorado, northern New Mexico, and

southeastern Colorado, which are undergoing rapid and extensive change. A survey will be administered to a stratified random sample of citizens living in: Archuleta, La Plata, Montezuma, San Miguel, San Juan, and Delores counties in Colorado; San Juan county in New Mexico; and Grand, Wayne, Carbon, Emery and San Juan counties in Utah. Natural resource land managers and county government officials in these counties need to understand citizen knowledge of forest management policies—particularly regarding recreation management—in order to develop adequate management practices. The intended effect is to better inform managers and assist with development of citizen involvement programs.

Bureau Form Number: None.

Frequency: One time.

Description of Respondents:

Individuals or households.

Estimated Completion Time: 12

minutes per respondent (approximate).

Number of Respondents: 800 (1200 mail-surveys).

Burden Hours: 160 hours. (The burden hour estimates are based on 12 minutes to complete each questionnaire and a 67% return rate.)

Dated: December 30, 1997.

Dennis B. Fenn,

Chief Biologist.

Federal Geographic Data Committee (FGDC); Public Comment on the Proposal to Develop the "Governmental Unit Boundary Data Content Standard" as a Federal Geographic Data Committee Standard

ACTION: Notice; request for comments.

SUMMARY: The FGDC is soliciting public comments on the proposal to develop a "Governmental Unit Boundary Data Content Standard." If the proposal is approved, the standard will be developed following the FGDC standards development and approval process and will be considered for adoption by the FGDC.

In its assigned federal leadership role in the development of the National Spatial Data Infrastructure (NSDI), the Committee recognizes that FGDC standards must also meet the needs and recognize the views of State and local governments, academia, industry, and the public. The purpose of this notice is

to solicit such views. The FGDC invites the community to review the proposal and comment on the objectives, scope, approach, and usability of the proposed standard; identify existing related standards; and indicate their interest in participating in the development of the standards.

DATES: Comments must be received on or before January 31, 1998.

CONTACT AND ADDRESSES: Comments may be submitted via Internet mail or by submitting electronic copy on diskette. Send comments via internet to: gdc-govunit@www.fgdc.gov.

A soft copy version, on a 3.5×3.5 diskette in WordPerfect 5.0 or 6.0/6.1 format, along with one hardcopy version of the comments may be sent to the FGDC Secretariat (attn: Jennifer Fox) at U.S. Geological Survey, 590 National Center, 12201 Sunrise Valley Drive, Reston, Virginia, 22092.

SUPPLEMENTARY INFORMATION: Following is the complete proposal for the "Governmental Unit Boundary Data Content Standard".

Date of Proposal: November 1997.

Project Title: Governmental Unit Boundary Data Content Standard.

Submitting Organization: Federal Geographic Data Committee (FGDC) Subcommittee on Cultural and Demographic Data (SCDD).

Objectives: To provide consistency in the maintenance and interchange of governmental unit boundaries and facilitate the analysis of and comparison between the boundaries.

Scope: The Governmental Unit Boundary Data Content Standard (the Standard) will be an FGDC data content standard. The Standard will identify and provide semantic definitions and rules for utilizing components for describing governmental unit boundaries.

The applicability of the Standard; that is, the domain of entities the components shall be used to describe the boundaries of, is limited to governmental units although the Standard's principles may be extended to describe the boundaries of other geographic entities. The Standard adopts the U.S. Bureau of the Census description of a governmental unit as:

A geographic entity established by legal action, and for the purpose of implementing administrative or governmental functions. Most governmental units have officially recognized boundaries. All area and population of the United States are part of one or more legal units.

1. The Census Bureau recognizes six categories of governmental units: active governmental unit, administrative entity, functioning governmental unit,

general purpose government, inactive governmental unit, legal entity, and nonfunctioning governmental unit.

2. The Standard shall be applicable to all. The Standard will include a listing of the domain of governmental units recognized by the Census Bureau. Examples are: the Nation, American Indian reservation, States and statistically equivalent areas, counties and statistically equivalent areas, functioning and legal minor civil divisions, and incorporated places.

Justification: Governmental unit boundaries are a key part of many datasets. Although a large number of agencies present data which is either directly or indirectly referenced to governmental units, a relative few number of agencies are responsible for the collection and maintenance of governmental unit boundaries. Governmental unit boundaries are held by maintenance agencies in a format designed for their internal use, making the interchange of governmental unit boundaries to all interested parties unduly complex (for example, the Bureau of the Census maintains its governmental unit boundaries in its TIGER(tm) database). There is a need for an FGDC governmental unit boundary data content standard to improve the sharing and interchange of governmental unit boundaries amongst federal, state and local governmental and other interested participants.

The Bureau of the Census conducts a Boundary and Annexation Survey (BAS) to determine the inventory of legally defined entities and the correct names, political descriptions, and legal boundaries of counties, MCDs, and incorporated places as of January 1 of the year of the survey. The Standard will assist in the collection of this information.

The Standard meets the responsibilities stated in OMB Circular No. A-16 to develop standards through the FGDC to ensure that the spatial data produced by all Federal agencies is compatible.

The Development of a National Digital Geospatial Data Framework (Federal Geographic Data Committee publication, April, 1995) identified governmental units as one "layer" of the information content of framework. The Standard will assist in developing this aspect of framework. The development of the Standard is particularly timely in that Executive Order 12906 states the initial transportation, hydrology, and boundary elements of framework should be completed by January 1998 in order to support the decennial census of 2000. As Chair of the SCDD, the Department of Commerce, Bureau of the Census, has
