

Department determines that dumping is likely to continue if the order were revoked.

Because the Department based this determination on the continued existence of margins above *de minimis* and respondent interested parties' waiver of participation, it is not necessary to address the domestic interested parties' arguments concerning non-U.S. export markets, exports of nitromethane, or the price-competitive nature of chloropicrin.

**Magnitude of the Margin**

In the *Sunset Policy Bulletin*, the Department stated that it will normally provide to the Commission the margin that was determined in the final determination in the original investigation. Further, for companies not specifically investigated or for companies that did not begin shipping until after the order was issued, the Department normally will provide a margin based on the "all others" rate from the investigation. (See section II.B.1 of the *Sunset Policy Bulletin*.) Exceptions to this policy include the use of a more recently calculated margin, where appropriate, and consideration of duty absorption determinations. (See sections II.B.2 and 3 of the *Sunset Policy Bulletin*.)

The Department published, in the **Federal Register**, the antidumping duty order for chloropicrin from the PRC on March 22, 1984 (49 FR 10691). In this order, the Department established a weighted-averaged margin for SINOCEM of 58 percent. Also, in this order, the Department established a weighted-averaged margin for any other manufacturer/exporter of the subject merchandise of 58 percent.<sup>6</sup> We note that, to date, the Department has not issued any duty absorption findings in this case.

In its substantive response, the domestic interested parties recommended that, consistent with the *Sunset Policy Bulletin*, the Department provide to the Commission the original dumping margin of 58 percent established by the Department for all PRC manufacturers/exporters of chloropicrin.

The Department agrees with the domestic interested parties' argument concerning the choice of the margin to report to the Commission. In the original investigation, the Department calculated a margin for SINOCEM and established an "all others" rate for the remaining companies. The margin from

the original investigation is the only calculated rate that reflects the behavior of exporters without the discipline of the order. Therefore, consistent with the *Sunset Policy Bulletin*, we will report to the Commission the company-specific rate for SINOCEM and the "all others" rate from the original investigation for all remaining companies as the dumping margin likely to prevail if the order were revoked. These margins are contained in the **FINAL RESULTS OF REVIEW** section of this notice.

**Final Results of Review**

As a result of this review, the Department finds that revocation of the antidumping order would be likely to lead to continuation or recurrence of dumping at the margins listed below:

Manufacturer/Exporter	Margin (percent)
SINOCEM .....	58.0
All Other Manufacturers/Exporters .....	58.0

This notice serves as the only reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305 of the Department's regulations. Timely notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This five-year ("sunset") review and notice are in accordance with sections 751(c), 752, and 777(i)(1) of the Act.
