SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau plans to request clearance for the collection of data concerning the Housing and Vacancy Survey (HVS). The current clearance expires September 30, 1999. The HVS has been conducted in conjunction with the Current Population Survey (CPS) since 1956 and serves a broad array of data users as described below.

We conduct HVS interviews with landlords or other knowledgeable persons concerning vacant housing units identified in the monthly CPS sample and meeting certain criteria. The HVS provides the only quarterly and annual statistics on rental vacancy rates

and homeownership rates for the United States, the 4 census regions, the 50 states and the District of Columbia, and the 75 largest Metropolitan Areas (MAs). Private and public sector organizations use housing vacancy rates extensively to gauge and analyze the housing market with regard to supply, cost, and affordability at various points in time. In addition, the rental vacancy rate is a component of the index of leading economic indicators, published by the Department of Commerce.

Policy analysts, program managers, budget analysts, and congressional staff use these data to advise the executive and legislative branches of government with respect to the number and characteristics of units available for occupancy and the suitability of housing initiatives. Several other government agencies use these data on a continuing basis in calculating consumer expenditures for housing as a component of the gross national product to project mortgage demands and to measure the adequacy of the supply of rental and homeowner units. In addition, investment firms use HVS data to analyze market trends and for economic forecasting.

II. Method of Collection

Field representatives collect HVS information by personal-visit interviews in conjunction with the regular monthly CPS interviewing. We collect HVS data concerning units that are vacant and intended for year-round occupancy as determined during the CPS interview. Approximately 4,800 units in the CPS sample meet these criteria each month. All interviews are conducted using computer-assisted interviewing.

III. Data

OMB Number: 0607-0179.

Form Number: There are no forms associated with the HVS. We conduct all interviewing on computers.

Type of Review: Regular.

Affected Public: Individuals who have knowledge of the vacant sample unit (e.g., landlord, rental agents, neighbors).

Estimated Number of Respondents: 4,800 per month.

Estimated Time Per Response: 3 minutes.

Estimated Total Annual Burden Hours: 2,880.

Estimated Total Annual Cost: The only cost to respondent is that of their time.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, U.S.C., Section 182.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information

is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: March 8, 1999.

SUPPLEMENTARY INFORMATION:**I. Abstract**

The Census Bureau plans to request clearance for the collection of data concerning the School Enrollment Supplement to be conducted in conjunction with the October 1999 CPS. The Census Bureau and the Bureau of Labor Statistics (BLS) sponsor the basic annual school enrollment questions, which have been collected annually in the CPS for 30 years.

This survey provides information on public/private elementary school, secondary school, and college enrollment, and on characteristics of private school students and their families, which is used for tracking historical trends, policy planning, and support. This year's supplement will also contain questions that were last asked in October 1995. These questions concern language proficiency, disabilities, and grade retention for persons 3–24 years of age. This survey is the only source of national data on the age distribution and family characteristics of college students and the only source of demographic data on preprimary school enrollment. As part of the federal government's efforts to collect data and provide timely information to local governments for policymaking decisions, the survey provides national trends in enrollment and progress in school.

II. Method of Collection

The school enrollment information will be collected by both personal visit and telephone interviews in conjunction with the regular October CPS interviewing. All interviews are conducted using computer-assisted interviewing.

III. Data

OMB Number: 0607–0464.

Form Number: There are no forms.

We conduct all interviews on computers.

SUPPLEMENTARY INFORMATION:**I. Abstract**

Commerce/BXA, in coordination with other government agencies and private entities, conduct assessments of U.S. industries deemed critical to our national security. The information gathered is needed to assess the health and competitiveness as well as the needs of the targeted industry sector in order to maintain a strong U.S. industrial base.

II. Method of Collection

The information for each industry sector will be collected using a one-time, mandatory survey. The data will be collected in written or magnetic form.

III. Data

The survey will collect common as well as sensitive business performance measure information including but not limited to: past and estimated future revenues; workforce data; financial information; production capabilities; shipments; defense conversion; research and development expenditures; capital expenditures; funding sources; investments; importing and exporting; and vendor/supply problems. Subjective information addressing competitiveness issues, the effects of regulations and policies, technology requirements and business outlook are also obtained to assist in developing a more comprehensive analysis.
