BILLING CODE 7533-01-M

NUCLEAR REGULATORY COMMISSION

Baltimore Gas and Electric Company (Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2 and the Independent Spent Fuel Storage Installation)

[Docket Nos. 50-317, 50-318, and 72-8]

Order Approving Application Regarding Restructuring of Baltimore Gas and Electric Company

I

Baltimore Gas and Electric Company (BGE) is the licensee for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, and the associated Independent Spent Fuel Storage Installation (ISFSI). BGE has the exclusive responsibility for the construction, operation, and maintenance of Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, and the ISFSI, as reflected in Operating Licenses Nos. DPR-53 and DPR-69, and Materials License No. SNM-2505 issued by the U.S. Nuclear Regulatory Commission (NRC or the Commission) on July 31, 1974, November 30, 1976, and November 25, 1992, respectively. The facility is located on the western shore of the Chesapeake Bay, in Calvert County, Maryland.

II

Under cover of a letter dated November 20, 1998, BGE submitted an application, which was supplemented by letter dated January 8, 1999, for approval by the Commission, pursuant to 10 CFR 50.80 and 10 CFR 72.50, regarding a proposed corporate restructuring action that would result in the indirect transfer of the operating licenses for the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, and the associated ISFSI. Under the proposed

restructuring, BGE would form, and become a wholly owned subsidiary of, a new holding company. Current stockholders of BGE common stock would become stockholders of the new holding company's common stock. BGE would continue to directly hold the licenses following the restructuring.

According to the application, BGE will continue to be an "electric utility" as defined in 10 CFR 50.2, as a wholly owned subsidiary of the new holding company. In addition, adoption of the new holding company structure will not affect BGE's management of nuclear operations or BGE's technical qualifications. The restructuring will involve no significant change in the personnel who operate and maintain the Calvert Cliffs Nuclear Power Plant and the ISFSI.

A Notice of Consideration of Approval of Application Regarding Proposed Corporate Restructuring was published in the **Federal Register** on January 8, 1999 (64 FR 1244).

Under 10 CFR 50.80 and 10 CFR 72.50, no license shall be transferred, directly or indirectly, through transfer of control of the license, unless the Commission shall give its consent in writing. Upon review of the information submitted in the application of November 20, 1998, as supplemented by letter dated January 8, 1999, the NRC staff has determined that the restructuring of BGE by establishment of a holding company will not affect the qualifications of BGE as the holder of licenses for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, and as the holder of the license for the ISFSI, and that the transfer of control of the licenses, to the extent effected by the proposed restructuring, is otherwise consistent with applicable provisions of law, regulations, and orders issued by the Commission, subject to the conditions set forth herein. These findings are supported by a safety evaluation dated March 8, 1999.

III

Accordingly, pursuant to Sections 161b, 161i, 161o, and 184 of the Atomic Energy Act of 1954, as amended, 42 USC §§ 2201(b), 2201(i), 2201(o), and 2234, 10 CFR 50.80, and 10 CFR 72.50, *it is hereby ordered* that the application regarding the proposed restructuring of BGE by the establishment of a holding company is approved, subject to the following: (1) BGE shall provide the Director, Office of Nuclear Reactor Regulation, and the Director, Office of Nuclear Material Safety and Safeguards, a copy of any application, at the time it is filed, to transfer (excluding grants of security interests or liens) from BGE to
