SUPPLEMENTARY INFORMATION:

The proposed development site is
located approximately 2.9 miles
northeast of the Jacksonville City Hall
and is located off of Walgreen Road in
Jacksonville, Duval County, Florida. The
EA indicates that the site is located

within an approximate 40-acre wooded
and undeveloped parcel. The subject
property has undeveloped parcels of
land as well as land developed with
commercial, industrial, and residential
properties in the vicinity (one eighth
mile).

The property is currently owned by
JARU Inc., Mr. Lawrence and Linda
DuBow, and Mr. Leonard Setzer. The
site does not contain any structures, and
historical aerial photographs indicate
that the property has been wooded
dating back to 1951, with the exception
of a small residential structure that was
historically found in the northeast
corner of the subject property. The
structure is no longer standing, but a
portion of the foundation is still
standing.

The proposed Jacksonville Job Corps
Center will be a totally new facility
utilizing a campus setting. The new Job
Corps Center will replace the existing
Job Corps facility currently located at
205 West Third Street in Jacksonville,
Florida. The new facility will consist of
multiple buildings which will support
272 Resident Students and 28 Non-
resident Students. The new facility will
consist of no fewer than eight buildings,
including dormitories, vocational shops,
maintenance and warehouse, cafeteria,
physical fitness center, administration
and support facilities, and classroom
facilities. There will be one dormitory
building for males and one dormitory
building for females, with a capacity of
136 students each. Classroom space will
be provided in an education building.
There will also be a vocational
education building, a cafeteria/culinary
arts building, a recreation building, an
administration and medical/dental
building, and a maintenance/warehouse
building. The gross area of the facility
will be 151,500 square feet, not
including proposed outdoor recreation
areas. The proposed project will be
constructed in accordance with local
fire and building code requirements.

The construction of the Job Corps
Center on this undeveloped parcel
would be a positive asset to the area in
terms of environmental and
socioeconomic improvements, and long-
term productivity. The construction of
the proposed Job Corps Center will
provide employment opportunities for
Jacksonville, Florida area residents. The
Job Corps program provides basic
education, vocational skills training,
work experience, counseling, health
care and related support services for
young adults; the program is designed to
graduate students who are ready to
participate in the local economy.

The proposed project will not have
any significant adverse impact on any

natural systems or resources. All
construction or development activities
that will possibly impact jurisdictional
wetland areas will be conducted in
compliance with federal and state
requirements. There are no historically
significant buildings on the site, and no
areas of archaeological significance. No
state or federal threatened or
endangered species (proposed or listed)
have been located on the subject
property.

Air quality and noise levels should
not be affected by the proposed
development project in the light
industrial area in Jacksonville, Florida.
Due to the nature of the proposed
project, it would not be a source of air
pollutants or additional noise, except
possibly during construction of the
facility. All construction activities will
be conducted in accordance with
applicable noise and air pollution
regulations, and all pollution sources
will be permitted in accordance with
applicable pollution control
requirements. The proposed Job Corps
Center will not significantly increase the
vehicle traffic in the vicinity.

The proposed project will not have
any significant adverse impact on the
surrounding water, sewer, and storm
water management infrastructure. Water
and sewage service for the new facility
will be provided by the Jacksonville
Electric Authority (JEA). These utility
systems are readily accessible and have
sufficient capacity to accommodate the
new Job Corps Center. All wastewater
from the center will be treated at JEA's
Main Street wastewater treatment plant.
All drinking water will be provided by
the JEA's Buckman water treatment
plant, which is the municipal water
supply for the surrounding area.
Drinking water for the Buckman plant is
obtained from deep wells into the
Florida Aquifer. Storm water runoff
from parking lots, sidewalks, and other
structures will be managed in
accordance with the requirements of the
St. Johns River Water Management
District (SJRWMD), and storm water
runoff is not anticipated to adversely
impact area surface water quality.

The City of Jacksonville, Office of
Solid Waste and Resource Management,
operates its own landfill (Trail Ridge
Landfill). Municipal solid waste is
collected weekly by the city. The
estimated life remaining at the landfill
is 21 years, based on recent
implementation of a recycling program.
Waste disposal at the new Job Corps
Center will be provided by either the
Office of Solid Waste and Resource
