Copies of items in the docket may be requested by writing Docket A-98-49 at the address provided above, or by calling (202) 260-7548. As provided in EPA's regulations at 40 CFR part 2, and in accordance with normal EPA docket procedures, a reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Jim Oliver, Office of Radiation and Indoor Air, (202) 564-9310, or call EPA's 24-hour, toll-free WIPP Information Line, 1-800-331-WIPP, or visit our website at <http://www.epa.gov/radiation/wipp/announce.html>.

SUPPLEMENTARY INFORMATION: The DOE is developing the WIPP near Carlsbad in southeastern New Mexico as a deep geologic repository for disposal of TRU radioactive waste. As defined by the WIPP Land Withdrawal Act (LWA) of 1992 (Public Law 102-579), as amended (Public Law 104-201), TRU waste consists of materials containing elements having atomic numbers greater than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Most TRU waste consists of items contaminated during the production of nuclear weapons, such as rags, equipment, tools, and organic and inorganic sludges.

On May 13, 1998, EPA announced its final compliance certification decision to the Secretary of Energy (published May 18, 1998, 63 FR 27354). This decision states that the WIPP will comply with the EPA's radioactive waste disposal regulations at 40 CFR part 191, subparts B and C.

The final WIPP certification decision includes a condition that prohibits shipment of TRU waste for disposal at WIPP from any site other than LANL until EPA has approved the procedures developed to comply with the waste characterization requirements of § 194.24(c)(4) (condition 3 of appendix A to 40 CFR part 194). The EPA's approval process for waste generator

sites is described in § 194.8. As part of EPA's decision making process, DOE is required to submit to EPA appropriate documentation of waste characterization programs at each DOE waste generator site seeking approval for shipment of TRU radioactive waste to WIPP. In accordance with § 194.8, EPA will place such documentation in the official Air Docket in Washington, D.C., and in informational dockets in the State of New Mexico, for public review and comment.

EPA inspected certain waste characterization processes at INEEL on July 28-30, 1998. DOE is proposing to use processes that EPA did not previously inspect at INEEL that are applicable to waste streams in the categories of homogeneous solids, debris waste, and soils and gravels. EPA will conduct an inspection of INEEL to verify that these additional processes comply with 40 CFR 194.24.

The INEEL documents submitted to EPA are: "Quality Assurance Project Plan for the Transuranic Waste Characterization Program (PLN-190), Revision 3 (April 1999)," "INEEL TRU Waste Characterization, Transportation, and Certification Quality Program Plan (PLN-182), Revision 3 (April 1999)," and "Program Plan for Certification of INEEL Contact-Handled Stored Transuranic Waste (INEL-96/0345), Revision 2 (April 1999)." The "Quality Assurance Project Plan for the Transuranic Waste Characterization Program (PLN-190), Revision 3 (April 1999)" and the "INEEL TRU Waste Characterization, Transportation, and Certification Quality Program Plan (PLN-182), Revision 3 (April 1999)" set forth the quality assurance program applied to TRU waste characterization at INEEL. The "Program Plan for Certification of INEEL Contact-Handled Stored Transuranic Waste (INEL-96/0345), Revision 2 (April 1999)" sets forth the waste characterization procedures for TRU wastes at INEEL. After EPA reviews these documents, EPA will conduct an inspection of INEEL to determine whether the requirements set forth in these documents are being adequately implemented in accordance with Condition 3 of the EPA's WIPP certification decision (appendix A to 40 CFR part 194). In accordance with § 194.8 of the WIPP compliance criteria, EPA is providing the public 30 days to comment on the documents placed in EPA's docket relevant to the site approval process.

If EPA determines that the provisions in the documents are adequately implemented, EPA will notify the DOE by letter and place the letter in the

official Air Docket in Washington, D.C., and in the informational docket locations in New Mexico. A positive approval letter will allow DOE to ship additional TRU waste from INEEL. The EPA will not make a determination of compliance prior to the inspection or before the 30-day comment period has closed.

Information on the EPA's radioactive waste disposal standards (40 CFR part 191), the compliance criteria (40 CFR part 194), and the EPA's certification decision is filed in the official EPA Air Docket, Dockets No. R-89-01, A-92-56, and A-93-02, respectively, and is available for review in Washington, D.C., and at the three EPA WIPP informational docket locations in New Mexico. The dockets in New Mexico contain only major items from the official Air Docket in Washington, D.C., plus those documents added to the official Air Docket after the October 1992 enactment of the WIPP LWA.
