

dredging within the San Diego Naval Complex. The EIS will also consider the No-Action Alternative: no demolition, replacement or new pier construction to accommodate the DDPI ships.

The EIS will evaluate the environmental effects associated with each of the alternatives. Various options for dredged sediment disposal will also be evaluated. Issues to be addressed in the EIS include, but are not limited to: water resources; biological resources; topography/geology; air quality; health and safety; land use; noise; transportation (vessel and ground); aesthetics; cultural resources; utilities; socioeconomics; and environmental justice. Impacts analysis will include an evaluation of the direct, indirect, short-term, and cumulative impacts. No decision to implement any of the alternatives will be made until the NEPA process is complete.

A public scoping meeting to receive oral and written comments from the public will be held on June 9, 1999 at the Holiday Inn, Terrace Ballroom, 700 National City Boulevard (at 8th Street), National City. The meeting will begin at 7 p.m. A Spanish-language interpreter will be available at the meeting.

A brief presentation describing the proposed action, alternatives and the NEPA process will precede the request for public comments. It is important that federal, state, and local agencies, as well as interested organizations and individuals, take this opportunity to identify environmental concerns they feel should be addressed during preparation of the EIS. Agencies and the public are invited and encouraged to provide written comments in addition to, or in lieu of, oral comments at the public meeting. To be most helpful, comments should clearly describe specific issues or topics that the commentator believes the EIS should address.

ADDRESSES: Questions regarding the scoping process AND written comments may be sent to South Bay Area Focus Team, 2585 Callagan Highway, Bldg. 99, Naval Station, San Diego, San Diego, CA 92136-5198, postmarked no later than June 16, 1999.
