

How Will Applications Be Reviewed and Rated?

OSHA personnel will review and evaluate each application. Following the review process, OSHA staff may conduct an on-site evaluation of highly rated applicants before making a recommendation. The final selection will be made by the Assistant Secretary for Occupational Safety and Health.

The following factors will be used in the review of applications.

1. *Institutional Experience in Training Government Managers.* Reviewers will look for evidence that the university offers seminars in public administration or other nontraditional teaching methods (e.g., self-study) to motivate and train adults, e.g., government employees or executives, law enforcement personnel.

2. *Qualifications of Training Personnel.* Reviewers will look for evidence that the personnel proposed have training and experience in curriculum design and adult learning theory.

3. *Program Design.* Reviewers will look at the proposed program and budget charts for evidence that the project can be completed in the time allotted, that there will be adequate communication among the course designers, OSHA, and consultation projects throughout the project, and that the budget is reasonable and in compliance with instructions.

How Much Money Is Available for the Course?

\$250,000 has been budgeted for this effort.

How Long Will the Agreement Run?

The agreement period is for 24 months, from August 1, 1999, through July 31, 2001. As with all cooperative agreements, either party may terminate the agreement on 30 days notice.

How Do I Get an Agreement Application Package?

Agreement application packages may be requested from the Office of Cooperative Programs at (202) 693-2213.

When and Where Must I Send the Application?

Send three copies of each application to: Attention: E. Tyna Coles, U.S. Department of Labor—OSHA, Directorate of Federal-State Operations, Office of Cooperative Programs, 200 Constitution Avenue, NW, Room N3700, Washington, DC 20210.

All applications must be postmarked by Monday, June 30, 1999. Applicants are encouraged to include samples of

relevant previous work, but one copy of any sample will be sufficient.

How Will I Be Told If My Application Was Selected?

You will be notified in writing that you were or were not selected. Notice of selection will not constitute approval of an application as submitted. OSHA will negotiate with representatives of the selected applicant to enter into a 21(b) cooperative agreement which will cover the responsibilities of both parties, including program components, budget and administrative systems. If negotiations do not result in an acceptable submission, the Assistant Secretary for Occupational Safety and Health reserves the right to terminate the negotiation process and decline to fund the proposal.

Signed at Washington, DC, this 10th day of May, 1999.

Charles N. Jeffress,

Assistant Secretary of Labor.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-445 AND 50-446]

Texas Utilities Electric Company; Comanche Peak Steam Electric Station, Units 1 and 2; Correction to Federal Register Notice

The U.S. Nuclear Regulatory Commission (the Commission) issued a Notice of Exemption published in the

Federal Register on May 12, 1999 (64 FR 25520) to Texas Utilities Electric Company (the licensee), holder of Facility Operating Licenses No. NPF-87 and No. NPF-89, which authorizes operation of the Comanche Peak Steam Electric Station, Units 1 and 2. The Commission granted the licensee an exemption from the requirements of Title 10 of the *Code of Federal Regulations*, Part 50, Appendix K, to allow emergency core cooling system evaluation model assumptions to be conducted at no less than 1.01 times licensed power level when the qualification of power measurement uncertainty can be justified by the use of the Caldon Leading Edge Flowmeter System instrumentation.

Correction is being made to the first column, last paragraph on page 25522. The paragraph, which reads, in part, “* * * granting of this exemption will have no significant effect on the quality of the human environment (64 FR This exemption is effective upon issuance.” should read as follows: “* * * granting of this exemption will have no significant effect on the quality of the human environment (64 FR 23380). This exemption is effective upon issuance.”

Dated at Rockville, Maryland, this 14th day of May 1999.

For the Nuclear Regulatory Commission.

NUCLEAR WASTE TECHNICAL REVIEW BOARD

Board meeting: June 29-30, 1999—Beatty, NV: Review of the Department of Energy's (DOE) Analysis of a Design for a Potential Repository at Yucca Mountain, Nevada, and of Scientific Studies Undertaken at the Yucca Mountain Site

Pursuant to its authority under section 5051 of Public Law 100-203, Nuclear Waste Policy Amendments Act of 1987, the Nuclear Waste Technical Review Board (Board) will hold a meeting on Tuesday and Wednesday, June 29 and 30, in Beatty, Nevada, to review the U.S. Department of Energy's (DOE) analysis comparing possible repository designs and to hear reports on the status of scientific studies related to the characterization of a potential repository site at Yucca Mountain, Nevada. The meeting is open to the public. The Board will host an informal

gathering from 7:00 to 8:00 p.m. on Tuesday, June 29, for members of the public who would like to meet and talk with Board members. Interested parties also are invited to join the Board for coffee from 7:15 to 7:55 a.m. on Wednesday, June 30.

The meeting and associated events will be held at the Beatty Community Center, 200 A Avenue South, Beatty, Nevada 89003, (tel) 702-553-2050. The Board meeting sessions will begin at 9:00 a.m. on June 29 and at 8:00 a.m. on June 30.

The meeting sessions on June 29 will focus on the results of the DOE's License Application Design Selection project, which compares several alternative designs for a potential repository at Yucca Mountain. Presentations will include discussions of the criteria and assumptions that were used to compare the designs as well as issues that could affect repository design such as the use of ventilation to cool repository tunnels. Other presentations on that day will include updates on the status of the DOE's draft site-suitability criteria and of site-characterization efforts at Yucca Mountain.

The status of scientific studies being conducted at the Yucca Mountain site be the subject of the June 30 session. Presentations will be made on tests being conducted to obtain information on the unsaturated zone, the saturated zone, and the effects of heat on the mountain. Also on the agenda for June 30 are updates on the status of the Total System Performance Assessment (the analytical tool used to predict the performance of the potential repository) and of laboratory tests being conducted to determine the corrosion rates of potential waste package materials.

The Board is providing several opportunities for public comment at the Beatty meeting. Tie will be set aside in the late morning and at the end of the session on June 29 and at the end of the session on June 30 for comments from the public. Those wanting to speak are encouraged to sign the “Public Comment Register” at the check-in table. Depending on the number of requests, a time limit may be imposed on oral statements, but written comments of any length may be submitted for inclusion in the record of the meeting. Interested parties also may submit questions in writing to the Board. As time permits, written questions will be answered during the sessions on both days.

A detailed agenda will be available approximately one week before the meeting. Copies of the agenda can be requested by telephone or obtained from

the Board's Web site at www.nwtrb.gov. Transcripts of this meeting will be available on the Board's Web site, via e-mail, on computer disk, and on a library-loan basis in paper format from Davonya Barnes, Board staff, beginning on July 19, 1999. For further information, contact the NWTRB, Karyn Severson, External Affairs, 2300 Claredon Boulevard, Suite 1300, Arlington, Virginia 22201-3367; (tel) 703-235-4473; (fax) 703-235-4495; (e-mail) info@nwtrb.gov.

The Nuclear Waste Technical Review Board was created by Congress in the Nuclear Waste Policy Amendments Act of 1987. Its purpose is to evaluate the technical and scientific validity of activities undertaken by the DOE related to managing the disposal of the nation's spent nuclear fuel and high-level radioactive waste. In the same legislation, Congress directed the DOE to characterize a site at Yucca Mountain, Nevada, to determine its suitability as the location of a potential repository for the permanent disposal of spent nuclear fuel and high-level radioactive waste.

Dated: May 14, 1999.

Michael Carroll,

Deputy Executive Director, Nuclear Waste Technical Review Board.
