SUPPLEMENTARY INFORMATION: The Toxicological Review of Vinyl Chloride will provide the scientific basis for classifying the weight-of-evidence for the carcinogenicity of vinyl chloride, deriving cancer potency estimates for both the inhalation and oral route and deriving an oral reference dose (RfD) and inhalation reference concentration (RfC) for the noncancer health risk from exposure to vinyl chloride.

An earlier draft of the Toxicological Review was peer-reviewed at a workshop in June 1997 and has been revised based on comments received. This is the second peer-review workshop and the first public comment period for this document.

The IRIS Summary for Vinyl Chloride is formulated from the contents of the

Toxicological Review and is included to provide interested parties with the proposed changes to the Agency's Integrated Risk Information System (IRIS). While EPA is not soliciting comments on the IRIS Summary, any comments on the draft Toxicological Review received during the public comment period also will be considered in revising IRIS the Summary.
