## II. BACKGROUND

### A. What Issues Will the Workshop Address?

On Friday, June 18, 1999, the EPA/USDA will conduct a joint public workshop on Bt crops to discuss specific insect resistance management issues focusing on Bt corn. Four preselected panels will explore: Refuge Design and Deployment; Grower Education; Monitoring and Remedial Action; and Compliance Issues. The workshop will begin with introductory comments from representatives of EPA and USDA. Panelists will be selected beforehand from the various stakeholder groups: industry, academia, USDA, conventional and organic growers, public interest groups, and the National Corn Growers Association. Each panel's presentation will be followed by approximately 30-60 minutes of open discussion. Proceedings will be sent to all attendees and posted on the Biopesticides website: (<http://www.epa.gov/pesticides/biopesticides>).

EPA believes that managing insect resistance to Bt toxins is important because of the threat that resistance poses to the high benefits and low risk of using Bt toxins in transgenic crops and in microbial spray formulations. With use of Bt-crops increasing, EPA recognizes the value of ensuring that Bt crops and microbial Bt's remain effective against target pests for as long as possible. To this end, EPA has worked with stakeholders (e.g., industry, public sector research and extension, growers, user groups, public interest groups, and government agencies) to address resistance management for Bt crops.

**B. What Should I Do if I Want to Attend the Workshop?**

EPA strongly requests all persons planning on attending the workshop to preregister. This information is needed to ensure adequate space for attendees. There is no registration fee. To register, please visit the workshop website at <http://www.epa.gov/pesticides/biopesticides/btworkshop618.htm> and fill-out the registration form there.
