

preparation of the Draft EIS. The scoping process includes:

1. Identifying potential issues.
2. Identifying major issues to be analyzed in depth.
3. Considering additional alternatives based on themes which will be derived from issues recognized during scoping activities.
4. Identifying potential environmental effects of this project and alternatives (i.e. direct, indirect and cumulative effects and connected actions).

The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available to the public for review by April 1999. At that time, the EPA will publish a Notice of Availability of the Draft EIS in the **Federal Register**. The comment period on the Draft EIS will be 45 days from the date the EPA publishes the Notice of Availability in the **Federal Register**. It is important that those interested in the management of the Umatilla National Forest participate at that time.

The Final EIS is scheduled to be completed by June, 1999. In the Final EIS, the Forest Service is required to respond to comments and responses received during the comment period that pertain to the environmental consequences discussed in the Draft EIS and applicable laws, regulations and policies considered in making a decision regarding the proposal.

The Forest Service believes it is important to give reviewers notice, at this early stage, of several court rulings related to public participation in the environmental review process. First, reviewers of Draft EIS's must structure their participation in the environmental review of the proposal so that it is meaningful and alerts the agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp. v. NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft EIS stage but that are not raised until after completion of the final EIS may be waived or dismissed by the courts. *City of Angoon v. Hodel*, 803 F. 2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc. v. Harris*, 490 F. Supp. 1335, 1338 (E.D. Wis. 1980). Because of these court rulings it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider and respond to them in the final EIS.

To assist the Forest Service in identifying and considering issues and concerns or the proposed action, comments on the Draft EIS should be as

specific as possible. It is also helpful if comments refer to specific pages or chapters of the Draft EIS. Comments may also address the adequacy of the Draft EIS or merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental policy Act at 40 CFR 1503.3 in addressing these points).

The Forest Service is the lead agency. Thomas Reilly, District Ranger, is the Responsible Official. As the Responsible Official, he will decide which, if any, of the proposed projects will be implemented. He will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service Appeal Regulations (36 CFR part 215).

Dated: December 30, 1998.

Thomas K. Reilly,

District Ranger.
