consideration, you must submit comments on or before July 6, 1999.

ADDRESSES: Send your comments on the requirement to the Office of Management and Budget, Attention:

Department of the Interior Desk Officer, 725 17th Street, N.W., Washington, D.C. 20503, and to Rebecca Mullin, Service Information Collection Clearance Officer, U.S. Fish and Wildlife Service, ms 222–ARLSQ, 1849 C Street NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: To request a copy of the information collection request, explanatory information and related forms, contact Rebecca A. Mullin at (703) 358–2287, or electronically to rmullin@fws.gov.

SUPPLEMENTARY INFORMATION: The Office of Management and Budget (OMB) regulations at 5 CFR part 1320, which implement provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104-13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8(d)). The U.S. Fish and Wildlife Service (We) has submitted a request to OMB to renew its approval of the collection of information for the North American Woodcock Singing Ground Survey. We are requesting a 3year term of approval for this information collection activity. A previous 60-day notice on this information collection requirement was published in the February 16, 1999 (64 FR 7660) Federal Register inviting public comment. No comments on the previous notice were received as of April 20, 1999. This notice provides an additional 30 days in which to comment on the following information.

Federal agencies may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection of information is 1018–0019.

The Migratory Bird Treaty Act (16 U.S.C. 703-711) and Fish and Wildlife Act of 1956 (16 U.S.C. 742d) designate the Department of the Interior as the key agency responsible for the wise management of migratory bird populations frequenting the United States and for the setting of hunting regulations that allow appropriate harvests that are within the guidelines that will allow for those populations' well being. These responsibilities dictate the gathering of accurate data on various characteristics of migratory bird populations. The North American Woodcock Singing-Ground Survey is an essential part of the migratory bird

management program. This survey is conducted annually by State and Federal conservation agencies to provide the necessary data to determine the population status of the woodcock. In addition, the information is vital in assessing the relative changes in the geographic distribution of the woodcock. The information is used primarily by us to develop recommendations for hunting regulations. It is also used by us, State conservation agencies, University associates and other interested parties for various research and management projects. Without information on the population's status, we might promulgate hunting regulations that were too liberal thus causing harm to the woodcock population, or too conservative, thus unduly restricting recreational opportunities afforded by woodcock hunting.

Title: North American Woodcock Singing Ground Survey.

Approval Number: 1018–0019. Service Form Number: 3–156. Frequency of Collection: Annually.

Description of Respondents: State, local, tribal, provincial, or Federal employees.

Total Annual Burden Hours: The reporting burden is estimated to average 0.67 hours per respondent. The Total Annual Burden hours is 500 hours.

Total Annual Responses: About 750 individuals are expected to participate in the survey.

We invite comments concerning this renewal on: (1) Whether the collection of information is necessary for the proper performance of our migratory bird management functions, including whether the information will have practical utility; (2) the accuracy of our estimate of the burden of the collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and, (4) ways to minimize the burden of the collection of information on respondents. The information collections in this program are part of a system of record covered by the Privacy Act (5 U.S.C. 552(a)).

Dated: May 5, 1999.

Daniel M. Ashe.

Assistant Director for Refuges and Wildlife. [FR Doc. 99–14038 Filed 6–2–99; 8:45 am] BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of a Habitat Conservation Plan and Receipt of an Application for an Incidental Take Permit for the Maytag Trail, Douglas County, Colorado

AGENCY: Fish and Wildlife Service,

Interior.

ACTION: Notice of availability and

receipt of application.

SUMMARY: This notice advises the public that Douglas County has applied to the Fish and Wildlife Service for an incidental take permit pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended. The proposed permit would authorize the incidental take of the Preble's meadow jumping mouse (*Zopos hudsonius prebei*), federally listed as threatened, and loss and modification of its habitat associated with construction and use of a pedestrian and equestrian trail in Douglas County, Colorado. The permit would be in effect for 3 years.

We announce the receipt of the County's incidental take permit application that includes a proposed Low-Effect Habitat Conservation Plan for the Peble's meadow jumping mouse for the Maytag trail project. The proposed Habitat Conservation Plan is available for public comment. It fully describes the proposed project and the measures the County would undertake to minimize and mitigate project impacts to the Preble's meadow jumping mouse. We have made a preliminary determination that the County's Plan qualifies as a "low-effect" habitat conservation plan eligible for categorical exclusion under the National Environmental Policy Act. We explain the basis for this determination in an Environmental Action Statement, which is also available for public review. This notice is provided pursuant to section 10 (c) of the Act.

DATES: Written comments on the permit application and Plan should be received on or before July 6, 1999.

ADDRESSES: Comments regarding the permit application or the plan should be addressed to LeRoy Carlson, Field Supervisor, Fish and Wildlife Service, Colorado Field Office, P.O. Box 25486, DFC, Denver, CO 80225–0207. Comments may be sent by facsimile to (303) 275–2371.

FOR FURTHER INFORMATION CONTACT: Ms. Kathleen Linder, Fish and Wildlife Biologist, Colorado Field Office, telephone (303) 275–2370.

SUPPLEMENTARY INFORMATION:

Document Availability

Individuals wishing copies of the habitat conservation plan and associated documents for review should immediately contact the above office. Documents also will be available for public inspection, by appointment, during normal business hours at the above address.

Background

Section 9 of the Act and Federal regulation prohibit the "take" of a species listed as endangered or threatened, respectively (take is defined under the Act, in part, as to kill, harm, or harass a federally listed species). However, we may issue permits to authorize "incidental take" (defined by the Act as take that is incidental to, and not the purposed of, the carrying out of an otherwise lawful activity) of listed species under limited circumstances. Regulations governing permits for threatened species are promulgated in 50 CFR 17.32; regulations governing permits for endangered species are promulgated in 50 CFR 17.22.

The Maytag Trail would be located on Douglas County open space property. The Maytag Trail is a component of a regional trail system. The proposed trail and associated facilities will consist of:

A main trail 8 feet wide and about 5,820 feet long;

Two trail loops 4 feet wide and about 3,030 feet long;

A trail overlook encompassing about 0.25 acres; and

A trailhead consisting of about 1.4

The trail surface will be soft (crusher fines or crushed recycled concrete) or native surface as appropriate for the trail segment considering use and drainage.

Only one federally listed species, the threatened Preble's meadow jumping mouse occurs on site and has the potential to be adversely affected by the proposed trail project. To minimize and mitigate impacts that may result from incidental take of the mouse, the Country has agreed to: (1) coordinate with the Colorado Division of Wildlife to design and align the trail to minimize potential impacts to the mouse; (2) plant 20 gambel oaks (south gulch crossing) and 25 coyote willows (north gulch crossing) where the trail crosses mouse habitat to provide additional cover in the vicinity of the trail; (3) provide only in-kind services to the Colorado Division of Wildlife to assist them in determining the effects of the trail on the mouse; (4) manage the riparian areas of the property for mouse conservation; and (5) limit trail use and construction to daylight hours when the mouse is inactive.

We have made a preliminary determination that the County's Plan qualifies as a "low-effect" habitat conservation plan as defined by our **Habitat Conservation Planning** Handbook (November 1996). Low-effect habitat conservation plans are those involving: (1) minor or negligible effects on federally listed and candidate species and their habitats; and (2) minor or negligible effects on other environmental values or resources. The Maytag Trail Plan qualifies as a loweffect habitat conservation plan for the following reasons:

1. Approval of the Plan would result in minor or negligible effects on the mouse and its habitat. The County's management of the property as open space will likely have beneficial effects to the mouse. We do not anticipate significant direct or cumulative effects to the mouse resulting from construction or use of the trail.

3. Approval of the Plan would not result in any cumulative or growth inducing impacts and, therefore, would not result in significant adverse effects on public health or safety.

4. The Project does not require compliance with Executive Order 11988 (Floodplain Management), Executive Order 11990 (Protection of Wetlands), or the Fish and Wildlife Coordination Act. nor does it threaten to violate a Federal, State, local, or Tribal law or requirement imposed for the protection of the environment.

5. Approval of the Plan would not establish a precedent for future action or represent a decision in principle about future actions with potentially significant environmental effects.

We, therefore, have preliminarily determined that approval of the Plan as a categorical exclusion under the National Environmental Policy Act, as provided by the Department of the Interior Manual (516 DM 2, Appendix 1 and 516 DM 6, Appendix 1). Based upon this preliminary determination, we do not intend to prepare further National Environmental Policy Act documentation. We will consider public comments in making a final determination on whether to prepare such additional documentation.

This notice is provided pursuant to section 10(c) of the Act. We will evaluate the permit application, the Plan, and comments submitted therein to determine whether the application meets the requirements of section 10(a) of the Act. If it is determined that those requirements are met, a permit will be issued for the incidental take of the Preble's meadow jumping mouse in conjunction with the construction and use of the Maytag Trail. The final permit decision will be made no sooner than 30 days from the date of this notice.

Dated: May 26, 1999.

Terry T. Terrell,

Deputy Regional Director, Region 6. [FR Doc. 99-14004 Filed 6-2-99; 8:45 am]

Bureau of Indian Affairs

Indian Gaming

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of amendment to approved Tribal-State Compact.

SUMMARY: Pursuant to 25 U.S.C. 2710, of the Indian Gaming Regulatory Act of 1988 (Pub. L. 100-497), the Secretary of the Interior shall publish, in the Federal **Register**, notice of approved Tribal-State Compacts for the purpose of engaging in Class III (casino) gambling on Indian reservations. The Assistant Secretary-Indian Affairs, Department of the Interior, through his delegated authority, has approved the First Amendment to the Tribal/State Compact for Class III Gaming between the Kalispel Tribe of Indians and the State of Washington, which was executed on March 4, 1999.

DATES: This action is effective on June 3, 1999.

FOR FURTHER INFORMATION CONTACT:

George T. Skibine, Director Indian Gaming Management Staff, Bureau of Indian Affairs, Washington, DC 20240, (202) 219-4066.

Dated: May 20, 1999.
