The Bureau of Economic Analysis (BEA) uses this information to prepare the National Income and Products Accounts and to benchmark the annual input-output tables. Statistics provided from the Current Retail Sales and Inventory Survey are used to calculate the gross domestic product (GDP).

We currently publish retail sales and inventory estimates on the Standard Industrial Classification (SIC) basis. Starting in the spring of 2001, we will publish on the North American Industry Classification System (NAICS). Additionally, we are planning to add two new questions concerning Internet sales starting in FY 2000.
