**SUPPLEMENTARY INFORMATION:** The Department is submitting the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of

information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The Notice also lists the following information:

*Title of Proposal:* Study of the Effectiveness of Program Implementation of the Milwaukee Lead Hazard Control Ordinance.

*OMB Control Number:* To be assigned.

*Description of the need for the information and proposed use:* Despite dramatic reductions in blood-lead levels over the past 15 years, lead poisoning continues to be a significant health risk for young children. The Third National Health and Nutrition Examination Survey suggests that the greatest risk exists for children under the age of two. The development of a viable national strategy for the primary prevention of lead poisoning in these young children is a difficult task. The City of Milwaukee has enacted an ordinance requiring owners of pre-1950 rental properties in two target neighborhoods to carry out specified essential maintenance practices and standard treatments by April 30, 2000. The purpose of this information collection activity is to evaluate the feasibility, costs, and effectiveness (in terms of reducing residential dust-lead levels and preventing elevated blood-lead levels in children under two years of age) of the comprehensive primary prevention program being conducted in two target Milwaukee neighborhoods. The collected information will be used as vital input for developing a viable national strategy.

This information collection will involve conducting brief on site interviews of tenants, conducting visual inspections of rental units, collecting dust-wipe samples for lead analysis from selected floor and window sill locations, and obtaining blood-sample from study subjects. If appropriate, the results of this information collection will be used to improve existing HUD guidance for primary prevention lead-hazard control activities.

*Agency form numbers:* Not applicable.

*Members of affected public:* Selected residents of study neighborhoods within the City of Milwaukee.

*Total Burden Estimate:*

Number of respondents	Frequency of response	Total hours of response
320 .....	4	640

*Status of the proposed information collection:* New collection.

**Authority:** The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: June 14, 1999.
