

prepared an Information Collection Request (ICR), approved by OMB (OMB #240-0194) on July 31, 1998. EPA then sent nearly 700 questionnaires to contacts identified for each State, territory, and Indian Land. EPA supplemented the information from the questionnaire through telephone interviews, on-site file searches, and information from other sources.

EPA additionally sought information from the public through: the National Drinking Water Advisory Council (63 FR 66168, 64 FR 18903); two notices in the **Federal Register** (64 FR 1108, 64 FR 1007); presentations at meetings of the Ground Water Protection Council; an Internet Web site (<http://www.epa.gov/OGWDW/uic/cl5study.html>); and, the July 28, 1998 proposed rule (60 FR 44652).

Well-specific reports were drafted for each well type covered in the study. Although the reports are tailored to the particular issues relevant to the well type, all of the reports address the following basic topics: (1) Well purpose and fluids released; (2) the extent to which the fluids released exceed drinking water standards at the point of injection; (3) generalizations about the characteristics of the underground zone receiving fluids from the wells; (4) contamination incidents or studies, if any; (5) vulnerability of the wells to spills or illicit discharges; (6) prevalence of the wells; and (7) existing State and federal controls.

Most reports have undergone extensive peer and EPA workgroup review (or are currently under review). EPA coordinated peer reviews of draft reports for each of the types of wells studied to ensure technical accuracy and completeness of the documents. Technical experts were located through various sources including the Ground Water Protection Council and three **Federal Register** notices seeking peer sources including the Ground Water Protection Council and three **Federal Register** documents seeking peer reviewers (64 FR 1007-1008). It should be noted that some peer review comments have not yet been addressed and are not reflected in the summary being made available through this document.

Inventory Models

Because States believe that their inventories on storm water drainage wells and large-capacity septic systems are inaccurate, EPA constructed inventory models to predict the national inventories for these two well types. Due to the limited information available, EPA developed the inventory

models by analyzing data collected from visits to a sample of census tracts.

Elizabeth Fellows,

Acting Director, Office of Ground Water and Drinking Water.

BILLING CODE 6560-50-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than August 6, 1999.

A. Federal Reserve Bank of San Francisco (Maria Villanueva, Manager of Analytical Support, Consumer Regulation Group) 101 Market Street, San Francisco, California 94105-1579:

1. *EverTrust Financial Group, Inc.*, Everett, Washington; to become a bank holding company by acquiring 100 percent of the voting shares of Everett Mutual Bank, Everett, Washington, and Commercial Bank of Everett, Everett, Washington.

Board of Governors of the Federal Reserve System, July 7, 1999.

Robert deV. Frierson,

Associate Secretary of the Board.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 99-16859) published on pages 36016 and 36017 of the issue for Friday, July 2, 1999.

Under the Federal Reserve Bank of New York heading, the entry for Rome, MHC, Rome New York, is revised to read as follows:

A. Federal Reserve Bank of New York (Betsy Buttrill White, Senior Vice President) 33 Liberty Street, New York, New York 10045-0001:

1. *Rome, MHC*, Rome, New York; to become a bank holding company by acquiring 51 percent of the voting shares of Rome Bancorp, Inc., Rome, New York, and thereby indirectly acquire The Rome Savings Bank, Rome, New York.

In connection with this application, Rome Bancorp, Inc., Rome, New York, also has applied to become a bank holding company by acquiring 100 percent of the voting shares of The Rome Savings Bank, Rome, New York.

Comments on this application must be received by July 26, 1999.

Board of Governors of the Federal Reserve System, July 7, 1999.

Robert deV. Frierson,

Associate Secretary of the Board.

BILLING CODE 6820-BR-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of a Draft Recovery Plan for the Hine's Emerald Dragonfly (*Somatochlora hineana*) for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces availability for public review of a draft recovery plan for the Hine's emerald dragonfly (*Somatochlora hineana*), a species that is federally listed as endangered under the Endangered Species Act of 1973, as amended (Act). This species occurs on public and private land in Illinois, Michigan, and Wisconsin. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan received by September 13, 1999 will be considered by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor, Chicago, Illinois, Field Office, 1000 Hart Road, Suite 180, Barrington, Illinois 60010, telephone (847) 381-2253. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received will be available for public inspection by appointment during normal business hours, at the above address.

FOR FURTHER INFORMATION CONTACT: Louise Clemency at the above address, or telephone at (847) 381-2253, x215.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the federally threatened and endangered species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria which when met would result in a determination that the species no longer needs the protection of the Act, and provide estimates of the time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires public notice and opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into consideration in the course of implementing approved recovery plans.

The Hine's emerald dragonfly was listed as endangered on January 26, 1994. It inhabits marshes, sedge meadows, wet prairies and fens that have small ground water fed streams and occur in areas of dolomite bedrock. Fragmentation and destruction of habitat are believed to be the main reasons for this species' endangered status and continue to be the primary threats to its recovery. The species also seems to be vulnerable to off-site impacts to the ground water that feeds the habitat. The Hine's emerald dragonfly currently occurs at nine sites in the lower DesPlaines River valley in Illinois, at eleven sites in Door County, Wisconsin, and at seven sites in the Hiawatha National Forest in Mackinac County, Michigan. The Hine's emerald dragonfly has apparently been extirpated from Indiana and Ohio.

Recovery will be achieved and this species may be removed from the list of threatened and endangered plants when at least six viable populations, each composed of at least three subpopulations supporting 500

reproductive adults, are being protected and managed for the dragonfly. Site protection will be accomplished through negotiating cooperative agreements with landowners and working with land managers. Other recovery activities will include managing habitat, restoring populations, monitoring populations to detect trends, research, surveys, and conducting a general information program for the public.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by September 13, 1999 will be considered prior to approval of the plan. Comments should be sent to the Field Supervisor, Chicago, Illinois, Field Office, at the above address.

Authority: The authority for this action is the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: July 6, 1999.

Charles M. Wooley,

Program Assistant Regional Director, Ecological Services, Region 3, Fort Snelling, Minnesota.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of an Environmental Assessment and Receipt of Applications for Incidental Take Permits for the Delhi Sands Flower-loving Fly Associated With Industrial Developments on the Angelus Block Company Site, City of Rialto, San Bernardino County, California

AGENCY: Fish and Wildlife Service.

ACTION: Notice of availability.

SUMMARY: This notice advises the public that Angelus Block Company, Inc., Edward Antonini Residuary Trust, and E-Z Mix, Inc. (Applicants) have applied to the Fish and Wildlife Service for the approval of a Habitat Conservation Plan and issuance of incidental take permits pursuant to section 10(a)(1)(B) of the Endangered Species Act, 1973, as amended (Act). The Applicants propose to develop various industrial facilities, including: a sacking plant and facility for concrete, pre-blended mortar, asphalt and associated materials; a paver production plant; and a concrete block plant within various lots on the property. Except for those lots within the approximately 30.5-acre on-site Conservation Area, the other lots are
