These activities include health consultations and public health assessments at DOE sites listed on, or proposed for, the Superfund National Priorities List and at sites that are the subject of petitions from the public and other health-related activities such as epidemiologic studies, health surveillance, exposure and disease registries, health education, substance-specific applied research, emergency response, and preparation of toxicological profiles.

Purpose: This Study Team is charged with locating, evaluating, cataloging, and copying documents that contain information about historical chemical or radionuclide

releases from facilities at the Los Alamos National Laboratory since its inception. The purposes of this meeting is to review the goals, methods, and schedule of the project, discuss progress to date, provide a forum for community interaction, and serve as a vehicle for members of the public to express concerns to CDC.

Matters to be discussed: Agenda items include presentations from NCEH and/or its contractor regarding the information gathering project that recently began, and presentations from the National Institute for Occupational Safety and Health (NIOSH) and the Agency for Toxic Substances and Disease Registry (ATSDR) regarding the progress of current studies.
