NMOC), submission of a collection and control system design plan is required. After review of the design plan and installation of the collection and control system, an initial performance test and report for the system is required. Thereafter, annual compliance reports would be required.

For control systems using an enclosed combustion device, the initial performance test would also include the average combustion temperature, and the percent reduction of NMOC achieved. For control systems using a boiler, the initial performance report would include a description of the location at which the emission stream is introduced into the boiler, and the average combustion temperature of the boiler.

For control systems using an open flare, the initial performance report would include a description and the flare type, visible emissions reading, a heat content determination, flow rate measurements, and exit velocity determinations. Where control devices other than an open flare or closed combustion device are used, owners or operators would be required to submit to the Administrator information describing the control device and parameters that will indicate its proper performance.

Following submission of the initial performance report, owners or operators would be required to keep continuous monitoring records of the parameters reported in the initial performance report and records of monthly monitoring of the collection system and quarterly monitoring of surface methane concentration. Annual compliance reports and recordkeeping would include descriptions of any periods in which the value of any of the monitored operating parameters falls outside the established ranges and any period when the collection system or air pollution control equipment malfunctioned or when the collected gas was diverted from the control device. When applicable, each owner or operator of a controlled landfill will submit a closure report to EPA within 30 days of waste acceptance cessation.

The information collected will be used by EPA personnel to ensure compliance with the NSPS and identify the sources subject to the standards. When appropriate under NSPS, Subpart WWW, each owner or operator of a controlled landfill shall submit annual reports of exceedances, gas steam diversion, control device non-operation, collection system failure, the date at installations and the location of each well or well collection system and equipment removal. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 1/5/99 (64 FR 499); no comments were received.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 11.3 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners or Operators of MSW landfills for which construction, modification, or reconstruction commences on or began accepting waste after May 30, 1991.

Estimated Number of Respondents: 172 each year.

Frequency of Response: quarterly, annually.

Estimated Total Annual Hour Burden: 3,379 hours.

Estimated Total Annualized Cost Burden: \$80,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No. 1557.04 and OMB Control No. 2060–0220 in any correspondence.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared June 21, 1999 Through July 02, 1999 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564–5167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 09, 1999 (64 FR 17362).

Draft EISs

ERP No. D-AFS-L65319-OR Rating EO2, Pelican Butte Ski Area Master Development Plan, Implementation, Winema National Forest, Klamath Ranger District, Klamath County, OR.

Summary: EPA expressed environmental objections concerning insufficient information to predict impacts to water quality and air quality, especially visibility. Reductions in habitat, especially for the spotted owl, do not comply with the NW Forest Plan.

ERP No. D–BLM–J65298–CO Rating EC2, Yankee Gulch Sodium Minerals Project, To Produce Sodium Products, Piceance Basin, Right-of-Way Permit and COE Section 404 Permit, Rio Blanco County, CO.

Summary: EPA expressed environmental concerns for the protection of soil and ground water, and ensuring that impacts are monitored and mitigated.

ERP No. D–FHW–E40778–NC Rating EC2, US 74 Shelby Bypass Transportation Improvements, Construction, Funding and COE Section 404 Permit, Cleveland County, NC.

Summary: EPA is requesting further consideration of a bypass corridor to the south of the Shelby Central Business District. No particular bypass alternative to the north of Shelby is preferred by EPA, and the agency has noted substantial impacts to surface streams because they traverse two water supply watersheds and would require stream locations. Socioeconomic impacts (i.e., relocations, and noise) also appear to be substantial for a north bypass alternative.

ERP No. D–FHW–F40381–MN Rating EC2, Phalen Boulevard Project, Construction of a new 4.3 Kilometer Roadway, from I35E to Johnson Parkway, Funding, in the City of St. Paul, Ramsey County, MN.

Summary: EPA expressed environmental concerns regarding the remediation of contaminated sites that would most likely occur if the proposed project were to be implemented.

ERP No. D–FHW–K40233–CA Rating EC2, US–7 Expressway Project, Construction between CA–98 to Interstate 8, Improve Access to the new Calexico East Port of Entry, Funding and COE Section 404 Permit, Imperial County, CA.

Summary: EPA expressed environmental concerns with potential cumulative and secondary effects, as well as impacts to water quality and prime farmland.

ERP No. DS–AFS–J65277–CO Rating EC2, Sheep Flats Diversity Unit, Timber Sales and Related Road Construction, Additional Information on Soils and Water Quality, Grand Mesa, Uncompahgre and Gunnison National Forests, Colibran Ranger District, Mesa County, CO.

Summary: EPA expressed environmental concerns and requested additional information on the effectiveness of current Best Management Practices for mitigating sedimentation impacts.

Final EISs

ERP No. F-AFS-K65199-AZ, Windmill Range Allotment Management Plan, Cattle Grazing Use, Implementation, Coconino National Forest, Mormon Lake, Peaks and Sedona Ranger Districts, Coconino and Yavapal Counties, AZ.

Summary: Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

ERP No. F–FTA–K54022–CA, Third Street Light Rail Project, Transportation Improvements, Funding, U.S. Coast Guard Permit, and COE Section 404 Permit, San Francisco Municipal Railway, in the City and County of San Francisco, CA.

Summary: Review of the Final EIS has been completed and the project found to be satisfactory.

Dated: July 20, 1999. Joseph C. Montgomery, Environmental Protection Specialist, Office of Federal Activities. [FR Doc. 99–18884 Filed 7–22–99; 8:45 am] BILLING CODE 6560–50–U
