

requests a variance to temporarily change lake levels at H. Neely Henry Reservoir, part of the Coosa River Hydroelectric Project. Currently, lake levels must be maintained at elevation 508 msl from May 1 to October 31; drawn down to elevation 505 msl by about November 7 and maintained at this level until about April 15; then raised to elevation 508 msl by May 1. APC proposes to change H. Neely Henry Reservoir so it is maintained at elevation 508 msl from May 1 to September 30; drawn down to elevation 507 msl by December 1 and maintained at this level until April 1; then raised to elevation 508 msl by May 1. APC would change lake levels as described above for up to three years during a trial period. At the end of the trial, APC would decide whether to file an application to make the above lake levels permanent.

The Federal Energy Regulatory Commission (FERC) will be the lead agency in preparing an environmental assessment (EA) for this proposed action. The U.S. Army Corps of Engineers (Corps) will be a cooperating agency in the preparation of the EA. The FERC and Corps along with APC will jointly host a public meeting to explain APC's proposal and answer any questions. The public meeting will be at 7:00 p.m. on August 24, 1999, at the Elliott Community Center, 2827 West Meighan Blvd., Gadsden, AL 35904, (256) 549-4674).
