SUPPLEMENTARY INFORMATION:

Title: Royalty-in-Kind Pilot Program—Directed Third Party Communications Between Operators and Purchasers of Federal Royalty Oil and Gas.

OMB Control Number: 1010-0126.

Abstract: The Secretary of the Interior, under the Mineral Leasing Act (30 U.S.C. 192) and the Outer Continental Shelf Lands Act (43 U.S.C. 1353), is responsible for the management of royalties on minerals produced from leased Federal lands. MMS carries out these responsibilities for the Secretary. Most royalties are now paid in value—when a company or individual enters into a contract to develop, produce, and dispose of minerals from Federal lands, that company or individual agrees to pay the United States a share (royalty) of the full value received for the minerals taken from leased lands. MMS has undertaken several pilot programs to study the feasibility of taking the Government's royalty in the form of production, that is, as RIK.

Collection of RIK requires communication between the operators of a lease and the purchaser of RIK from that lease to assure accurate and timely delivery of MMS' royalty share of production volumes. On January 29, 1999, OMB granted emergency approval for MMS to instruct lessees (or their operators), through a letter to operators which contains reporting requirements, to conduct all necessary communications with RIK purchasers during RIK pilot activities.

The three kinds of directed communication between operators and purchasers of RIK are: (1) Information about the volumes made available as RIK; (2) information about transportation of the RIK; and (3) information about correcting volumes made available as RIK. Experience with the Wyoming and Texas 8(g) Pilots demonstrates that the directed communication requirements differ according to the needs of each pilot situation. For example, in the Wyoming Pilot, RIK is delivered to the purchaser at the lease. Therefore, the direction to make transportation arrangements was not included in letters issued to those operators. For these reasons, we are not requesting approval of specific letters to operators but, instead, approval for the three kinds of reporting requirements concerning communications between operators and purchasers of RIK. By obtaining approval for these three kinds of reporting requirements, MMS will be able to select the types of directed communications needed for each pilot and include only those types in a letter appropriate to the operation of that pilot.

The types of communication and supporting data MMS will require operators to use in setting up the monthly delivery of RIK to the purchaser are standard business practices in the oil and gas industry.

The information in the directed communication is essential to the delivery and acceptance of verifiable quantities and qualities of oil and gas and is exchanged as a normal part of the conduct of those business activities, even when operators are not directed to do so. Failure of lessees/operators and purchasers to timely communicate volumetric, delivery, and transportation information concerning MMS' RIK volumes will result in storage costs being incurred due to lack of pipeline space being reserved to move MMS' royalty production. Monetary penalties would also be incurred for failure to meet delivery due dates. Additionally, failure to communicate data from balancing accounts would severely impair MMS' ability to verify that it is receiving the full and accurate volume of its royalty share of production.

No proprietary information will be submitted to MMS under this collection. No items of a sensitive nature are collected. The requirement to respond is mandatory.

The PRA provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published on April 26, 1999 (64 FR 20321).

Estimated Number and Type of Respondents/Affected Entities:

Approximately 80 lessees or operators of Federal oil or gas leases participating in RIK pilot programs.

Frequency of Response: Monthly.
Burden Statement and Estimated Annual Reporting and Recordkeeping "Hour" Burden: We estimate the respondent burden to average 2 minutes per response for a total of 285 hours. We estimate no additional recordkeeping burden.

Estimated Annual Reporting and Recordkeeping "Non-Hour Cost"

Burden: We have identified no paperwork cost burdens for this collection.

Comments: Section 3506(c)(2)(A) of the Paperwork Reduction Act requires each agency " * * * to provide notice * * * and otherwise consult with members of the public and affected agencies concerning each proposed collection of information * * *". Agencies must specifically solicit comments to: (a) Evaluate whether the proposed collection of information is necessary for the agency to perform its duties, including whether the information is useful; (b) evaluate the accuracy of the agency's estimate of the

burden of the proposed collection of information; (c) enhance the quality, usefulness, and clarity of the information to be collected; and (d) minimize the burden on the respondents, including the use of automated collection techniques or other forms of information technology.

Send your comments directly to the offices listed under the addresses section of this notice. OMB has up to 60 days to approve or disapprove the information collection but may respond after 30 days. Therefore, to ensure maximum consideration, OMB should receive public comments by August 27, 1999.
