The Proposal

The FAA proposes to amend 14 CFR part 71 by establishing Class E airspace at Mountain Village, AK, due to the establishment of two GPS instrument approach procedures. The intended effect of this proposal is to provide additional controlled airspace for IFR operations at Mountain Village, AK.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. The Class E airspace areas designated as 700/1200 foot transition areas are published in paragraph 6005 in FAA Order 7400.9F, *Airspace Designations and Reporting Points*, dated September 10, 1998, and effective September 16, 1998, which is incorporated by reference in 14 CFR 71.1 (63 FR 50139; September 21, 1998). The Class E airspace designations listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9F, *Airspace Designations and Reporting Points*, dated September 10, 1998, and effective September 16, 1998, is to be amended as follows:

Background

On March 16, 1999, the FAA initiated Airspace Study 99–AAL–022–NR, Proposal to Establish Surface Areas at Aniak and St. Mary's Airports, at the request of Pen Air, Northern Air Cargo, and Arctic Transportation Services to consider the establishment of additional controlled Class E Airspace. This additional controlled Class E airspace would provide surface areas for aircraft flying IFR at the Aniak and St. Mary's airports.

Concerns expressed included: (1) it is disconcerting to be on an IFR approach knowing that Visual Flight Rule (VFR) aircraft may be in close proximity when the transition is made from IFR to VFR for landing; (2) aircraft are not required to talk on the Common Traffic Advisory Frequency (CTAF); (3) aircraft on instrument approach must mix with VFR aircraft in weather conditions as low as 'clear of clouds' and 'one-mile flight visibility'; and (4) an aircraft on an IFR approach could descend through the clouds and find themselves on a
