

requests are reviewed to ascertain if there is a health risk, and if CRP is technically feasible, practicable, and appropriate.

To certify, a registrant must submit the name and EPA registration number of the product to which the certification applies, the certification statement, the registrant's name and address, the date, and the name, title, and signature of the company officer making the certification. The certification statement must contain a statement that the pesticide product complies with 40 CFR 157.32 requirements, including the revised effectiveness standards in 16 CFR 1700.15(b) when tested by the revised protocol testing procedures in 16 CFR 1700.20. A description of the packaging used and the American Society for Testing and Materials (ASTM) Standard D3475-95, "Standard Classification of Child-Resistant Packages," designation is requested (not required). Registrants may also elect to submit data necessary to support a claim that the product is not subject to CRP, or request that the product should be exempt from CRP regulation.

V. What are EPA's Burden and Cost Estimates for This ICR?

Under the PRA, "burden" means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal Agency. For this collection it includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The ICR provides a detailed explanation of this estimate, which is only briefly summarized in this notice. The annual public burden for the Compliance Requirement for Child Resistant Packaging Act collection is estimated to average 1.7 hours per respondent. The following is a summary of the estimates taken from the ICR:

Respondents/affected entities:

Pesticide registrants whose pesticide products are subject to Child Resistant Packaging regulations.

Estimated total number of potential respondents: 502.

Frequency of response: Per event.

Estimated total/average number of responses for each respondent: 1.

Estimated total annual burden hours: 853.4.

Estimated total annual burden costs: \$55,019.20.

VI. Are There Changes in the Estimates from the Last Approval?

Yes. There is a slight increase in the number of respondents from 449 to 502 from the last ICR approval. However, the total burden hours per respondent to comply with the CRP will remain the same, 1.7 hours at a cost of \$109.60 per response. This increase is a result of the change in the percentage of registrants electing to certify to the CRP requirements. More respondents may be opting to certify to CRP due to changes in the cost of packaging, recycling, and safety factors. Or respondents may be electing to certify to CRP because it is less time consuming than electing to submit toxicity data, reformulate to a less toxic product, or request an exemption. Respondent costs are based on technical/managerial and clerical burden hours estimated at \$83 and \$38 per hour, respectively.

VII. What is the Next Step in the Process for This ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the person listed in the "FOR FURTHER INFORMATION CONTACT" section.
