BILLING CODE 4140-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Prospective Grant of Exclusive License: Vaccine to Treat and Prevent Disease Caused by Human Papillomaviruses, Particularly Cervical Cancer

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: This notice, in accordance with 35 U.S.C. 209(c)(1) and 37 CFR 404.7(a)(1)(I), that the National Institutes of Health (NIH), Department of Health and Human Services, is contemplating the grant of a exclusive license worldwide to practice the invention embodied in: PCT Patent Application Number PCT/US97/12115 (NIH Reference Number E-032-96/1), entitled "Infectious Papillomavirus Pseudoviral Particles", filed July 14, 1997, to American Home Products Corporation through its Wyeth-Ayerst Laboratories Division, Wyeth-Lederle Vaccines business unit, having a place of business in Madison, N.J. The patent right in this invention has been assigned to the United States of America.

DATES: Only written comments and/or application for a license which are received by the NIH Office of Technology Transfer on or before October 8, 1999 will be considered.

ADDRESSES: Requests for a copy of the patent application, inquiries, comments and other materials relating to the contemplated license should be directed to: Robert Benson, Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852-3804; Telephone: (301) 496-7056, ext. 267; Facsimile: (301) 402-0220, e mail: rb20m@nih.gov..

SUPPLEMENTARY INFORMATION: The patent application describes pseudoviral particles of papillomavirus capsids encapsidating DNA useful for gene therapy and as vaccines. The pseudoviral particles are made by co-expressing the papillomavirus L1, L2 and E2 genes in a cell line along with a vector comprising the useful DNA and DNA containing E2 protein binding sites (E2BS). The presence of the E2BS containing DNA results in the

encapsidation of the DNA. The encapsidated DNA can be a gene to replace a defective gene, or can encode an antigen, for gene therapy or immunization respectively. Since papillomaviruses selectively multiply in epithelial cells, the capsids may be particularly useful for mucosal vaccines, and for delivering genes to epithelial tissues. The existence of many non-crossreacting serotypes of human and other animal papillomaviruses can be taken advantage of to eliminate the problem of immune rejection upon the second injection of a pseudoviral particle. The same gene or antigen encoding DNA can be incorporated in pseudoviral particles of different serotypes for multiple dosing.

The prospective exclusive license will be royalty-bearing and will comply with the terms and conditions of 35 U.S.C. 209 and 37 CFR 404.7. The prospective exclusive license may be granted unless, within 60 days from the date of this published Notice, NIH receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

The field of use may be limited to the development of vaccines for the prevention or treatment of diseases in humans caused by infection with human papillomaviruses.

Properly filed competing applications for a license filed in response to this notice will be treated as objections to the contemplated license. Comments and objections submitted in response to this notice will not be made available for public inspection, and, to the extent permitted by law, will not be released under the Freedom of Information Act, 5 U.S.C. 552.

Date: August 3, 1999

Director, Division of Technology Development and Transfer, Office of Technology Transfer.

The purpose of the proposed federal action described in the environmental assessment is to formally designate critical habitat for two endangered fishes inhabiting the Virgin River. Both woundfin and Virgin River chub are listed as endangered species under provisions of the Endangered Species Act of 1973, as amended (Act). The designation of critical habitat for woundfin and Virgin River chub is needed pursuant to the non-discretionary legal requirement under the Act to designate critical habitat when a species is listed, and to comply with a court order to make a determination with regard to these
