2. The mining method or methods which would achieve maximum economic recovery of the coal, including specifications of seams to be mined and the most desirable timing and rate of production.
3. The quantity of coal.

4. If this tract is likely to be mined as part of an existing mine and therefore be evaluated on a realistic incremental basis, in relation to the existing mine to which it has the greatest value.

5. If this tract should be evaluated as part of a potential larger mining unit and evaluated as a portion of a new potential mine (i.e., a tract which does not in itself form a logical mining unit).

6. The configuration of any larger mining unit of which the tract may be a part.

7. Restrictions to mining which may affect coal recovery.

8. The price that the mined coal would bring when sold.

9. Costs, including mining and reclamation, of producing the coal and the time of production.

10. The percentage rate at which anticipated income streams should be discounted, either in the absence of inflation or with inflation, in which case the anticipated rate of inflation should be given.

11. Depreciation and other tax accounting factors.

12. The value of any surface estate where held privately.

13. Documented information on the terms and conditions of recent and similar coal land transactions in the lease sale area.

14. Any comparable sales data of similar coal lands.

Coal quantities and the FMV of the coal developed by BLM may or may not change as a result of comments received from the public and changes in market

conditions between now and when final economic evaluations are completed.

**DATES:** The public hearing will be held in the Salina City Hall located at 90 West Main Street in Salina, Utah, at 7:00 p.m. on March 3, 1999.
