SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is correct.

The Occupational Safety and Health Act of 1970 (the Act) authorizes information collection by employers as necessary or appropriate for enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents. (29 U.S.C. 657.) In this regard, the information collection requirement (the manufacturer's certification record) in the standard on Servicing Multi-Piece and Single Piece Rim Wheels (29 CFR 1910.177(d)(3)(iv)) ensures that employers protect employees from the hazards of a damaged restraining device in the event of a rim wheel separation or the sudden release of pressurized air.

II. Proposed Actions

OSHA proposes to retain its earlier estimate of six burden hours for the provision pertaining to the manufacturer's certification record in the standard on Servicing Multi-Piece and Single Piece Rim Wheels (29 CFR 1910.177(d)(3)(iv)).

OSHA will summarize the comments submitted in response to this notice, and will include this summary in the request to OMB to extend the approval of the information collection requirement contained in the above standard. *Type of Review:* Extension of currently approved information collection requirement.
