

should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final

determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, and to Jay Silberg, Esquire, Shaw, Pittman, Potts and Trowbridge, 2300 N Street NW., Washington, DC 20037, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendment dated November 23, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, PA 18701.

Dated at Rockville, Maryland, this 27th day of January, 1999.

For the Nuclear Regulatory Commission.

## NUCLEAR REGULATORY COMMISSION

[Docket No. 50-440]

### FirstEnergy Nuclear Operating Company (Perry Nuclear Power Plant, Unit No. 1); Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50, Appendix A, General Design Criterion (GDC) 19 to FirstEnergy Nuclear Operating Company (the licensee), for the Perry Nuclear Power Plant, Unit No. 1 (PNPP) located in Lake County, Ohio.

#### Environmental Assessment

##### Identification of the Proposed Action

By application dated December 3, 1998, the licensee requested an exemption from the control room dose acceptance criterion of 10 CFR part 50, Appendix A, General Design Criterion (GDC) 19, "Control Room." The proposed action would permit use of a 5 rem total effective dose equivalent (TEDE) control room dose acceptance criterion in lieu of "5 rem whole body, or its equivalent to any part of the body" as currently stated in GDC 19.

##### The Need for the Proposed Action

The NRC has established control room dose acceptance criteria in 10 CFR part 50, Appendix A, GDC 19 for all light-water power reactors. GDC 19 requires, in part, that, "Adequate radiation protection shall be provided to permit access and occupancy of the control room under accident conditions without personnel receiving radiation exposures in excess of 5 rem whole body, or its equivalent to any part of the body, for the duration of the accident."

As described in SECY-96-242, "Use of the NUREG-1465 Source Term at Operating Reactors," the staff informed the Commission of its approach to allow the use of the revised accident source term described in NUREG-1465, "Accident Source Terms for Light-Water Nuclear Power Plants," at operating plants. In the SECY paper, the staff described its plans to review plant applications implementing this source term and that the TEDE methodology would be incorporated in these reviews. The Commission approved these plans and directed the staff to commence rulemaking and requested the use of a TEDE dose methodology in the implementation of the revised accident source term. The TEDE dose guidelines,

which are needed to support revised accident source term applications, are not currently provided in regulations governing operating reactors.

By letter dated December 3, 1998, the licensee submitted an exemption request to the control room dose acceptance criteria of 10 CFR part 50, Appendix A, General Design Criterion (GDC) 19. The exemption request would permit use of a 5 rem total effective dose equivalent (TEDE) dose acceptance criterion in place of the "5 rem whole body, or its equivalent to any part of the body" dose acceptance criterion that is currently specified in GDC 19.

#### *Environmental Impacts of the Proposed Action*

The staff has completed its evaluation of the proposed action and concludes that it is acceptable because the staff has concluded that the TEDE methodology provides an alternate means of meeting the current regulatory requirement. The proposed action will not increase the probability or consequences of accidents, no significant changes are being made in the types of any effluents that may be released offsite, and there is no significant increase in the allowable occupational or public radiation exposure. The staff has concluded that there is no significant radiological environmental impact associated with the proposed action.

The proposed action does not affect nonradiological plant effluents and has no other environmental impact. Accordingly, the Commission concludes that there are no significant environmental impacts associated with the proposed action.

#### *Alternatives to the Proposed Action*

Since the staff has concluded that there is no significant environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered denial of the action (no-action alternative). Denial of the application would result in no change in current environmental impacts. The environmental impacts of the proposed action and the alternative action are similar.

#### *Alternative Use of Resources*

This action does not involve the use of any resources not previously

considered in the Final Environmental Statement which was issued August 1982.

#### *Agencies and Persons Consulted*

In accordance with its stated policy, the Ohio State official was contacted regarding the environmental impact of the proposed action. The State official had no comments.

#### *Finding of No Significant Impact*

Based upon the environmental assessment, the staff concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the staff has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated December 3, 1998, which is available for public inspection at the Commission's Public Document room, The Gelman Building, 2120 L Street, NW, Washington, DC, and at the local public document room located at the Perry Public Library, 3753 Main Street, Perry, OH 44081.

Dated at Rockville, Maryland, this 26th day of January 1999.

## **NUCLEAR REGULATORY COMMISSION**

### **Advisory Committee on Reactor Safeguards Subcommittee Meeting on Thermal-Hydraulic Phenomena**

The ACRS Subcommittee on Thermal-Hydraulic Phenomena will hold a meeting on February 23, 1999, Room T-2B1, 11545 Rockville Pike, Rockville, Maryland.

Portions of this meeting will be closed to public attendance to discuss Westinghouse proprietary information pursuant to 5 U.S.C. 552b(c)(4).

The agenda for the subject meeting shall be as follows:

*Tuesday, February 23, 1999—8:30 a.m. until the conclusion of business*

The Subcommittee will continue its review of the application of

Westinghouse Electric Company's WCOBRA/TRAC best-estimate large-break LOCA code to Westinghouse plants with Upper Plenum Injection (UPI). The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the cognizant ACRS staff engineer named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the Westinghouse Electric Company, the NRC staff, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been canceled or rescheduled, the scheduling of sessions which are open to the public, and the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor, can be obtained by contacting the cognizant ACRS staff engineer, Mr. Paul A. Boehnert (telephone 301/415-8065) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two working days prior to the meeting to be advised of any potential changes to the agenda, etc., that may have occurred.

Dated: January 26, 1999.

**Sam Duraiswamy,**

*Chief, Nuclear Reactors Branch.*
