SUPPLEMENTARY INFORMATION: This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the August 13, 1999, **Federal Register** (64 FR 156), GIPSA announced that Los Angeles Grain Inspection Service, Inc. (Los Angeles) asked GIPSA to cancel their designation August 27, 1999. GIPSA asked persons interested in providing official services in the geographic area formerly assigned to Los Angeles to submit an application for designation. Applications were due by September 13, 1999. California applied for designation to provide official services in the entire Los Angeles area.

Since California was the only applicant, GIPSA did not ask for comments.

GIPSA evaluated all available information regarding the designation criteria in section 7(f)(1)(A) of the Act and, according to section 7(f)(1)(B), determined that California is able to provide official services in the geographic area for which they applied.

California is designated to provide official services in the geographic area specified in the August 13, 1999, **Federal Register**, effective October 1, 1999, and ending January 31, 2000, concurrently with the end of California's present designation.

Interested persons may obtain official services by calling California at 916-654-0743.

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of Intent To Extend and Revise a Currently Approved Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (Pub. L. No. 104–13) and Office of Management and Budget (OMB) regulations at 5 CFR Part 1320 (60 FR

44978, August 29, 1995), this notice announces the National Agricultural Statistics Service's (NASS) intention to request an extension for and revision to a currently approved information collection, the Agricultural Surveys Program.

DATES: Comments on this notice must be received by December 6, 1999 to be assured for consideration.

ADDITIONAL INFORMATION OR COMMENTS: Contact Rich Allen, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, 1400 Independence Avenue SW, Room 4117 South Building, Washington, D.C. 20250–2000, (202) 720–4333.

SUPPLEMENTARY INFORMATION:

Title: Agricultural Surveys Program.

OMB Number: 0535–0213.

Expiration Date of Approval:

November 30, 2000.

Type of Request: Intent to extend and revise a currently approved information collection.

Abstract: The National Agricultural Statistics Service is responsible for collecting and issuing state and national estimates of crop and livestock production, grain stocks, farm numbers, land values, on-farm pesticide usage, and pest crop management practices.

The Agricultural Surveys Program contains a series of surveys that obtains basic agricultural data from farmers and ranchers throughout the Nation for preparing agricultural estimates and forecasts of crop acreages, yield, and production; stocks of grains and soybeans; hog and pig numbers; sheep inventory and lamb crop; cattle inventory; and cattle on feed. Grazing fees, land values, pesticide usage, and pest management practices data are also collected.

Uses of the statistical information are extensive and varied. Producers, farm organizations, agribusinesses, state and national farm policy makers, and government agencies are important users of these statistics. Agricultural statistics are used to plan and administer other related Federal and state programs in such areas as consumer protection, conservation, foreign trade, education and recreation.

One important part of this program, the Quarterly Hog Survey, is being revised to discontinue collecting and publishing the market hog inventory by weight groups. Currently, the Quarterly Hog Survey collects information on the inventory of total hogs, breeding hogs, market hogs by weight groups, (under 60 pounds, 60 to 119 pounds, 120–179 pounds, and over 180 pounds); monthly and quarterly sows farrowing and pig

crops; and sows farrowing intentions for the coming 6 months in 3-month intervals.

Hog producers have requested that NASS discontinue asking the questions on market hogs by weight groups since it is difficult for them to accurately provide the information. Responses to the weight group questions are often the producers' best estimates since their record keeping systems generally do not readily provide the information. Plans are for the Quarterly Hog Survey to continue to provide information on total market hogs, and monthly and quarterly pig crops. Data users can utilize monthly pig crop data in lieu of marketing hog weight group data to get an indication of hog supplies coming to market over the next six months. Publication of the market hog weight groups will be discontinued starting with the June 23, 2000 Hog Report.

A second revision to the program is the addition of questions regarding sheep and goat losses to predators and non-predators, methods being used to reduce these losses, and the cost of these preventative measures. These additional questions will be asked only in January 2000. Aggregated totals will be provided to the USDA's Animal and Plant Health Inspection Service action agency, Wildlife Services. These data will be used by Wildlife Services to help identify the causes of livestock losses.

The third revision is the addition of three questions to the Fall Area and January Cattle Surveys and one question to the January Sheep and Goat Survey. These questions will be asked annually in selected states. The cattle questions will provide additional detail regarding the expected calf crop and animal slaughter practices. The additional goat question will help differentiate the breeding goals of Angora goat producers between meat and wool production.

The Agricultural Surveys Program has approval from OMB for a 3-year period. NASS intends to request that the program be approved for another 3 years.

These data are collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data collected under this authority are governed by Section 1770 of the Food Security Act of 1985, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 15 minutes per response.

Respondents: Farms.

Estimated Number of Respondents: 547,000.
