## NUCLEAR REGULATORY COMMISSION

[EA 98-081]

### Morrison Knudsen SGT, LLC; Confirmatory Order (Effective Immediately)

#### I

Morrison Knudsen (MK) is a construction engineering firm with operation at multiple reactor and nuclear materials facilities regulated by the U.S. Nuclear Regulatory Commission (NRC or Commission). MK headquarters is located in Cleveland, Ohio. SGT, LLC (SGT) is an affiliate of MK involved in the steam generator replacement projects for MK.

#### II

On March 13, 1997, the NRC Office of Investigations (OI) initiated an investigation to determine if a former Corporate Group Welding Engineer (GWE) for MK had been discriminated against for raising safety concerns. In its report issued on February 6, 1998 (OI Case No. 3-97-013), OI concluded that there was sufficient evidence to substantiate that discrimination occurred. Specifically, OI concluded that the GWE's identification of deficiencies in welding procedures by MK and SGT employees at the Point Beach Nuclear Plant was at least a contributing factor in MK's decision to remove him from his position as MK Corporate GWE on January 15, 1997. In addition, in a decision issued on October 28, 1997, a Department of Labor (DOL) Administrative Law Judge (ALJ), in DOL Case No. 97-ERA-34, determined that the removal of the GWE was in retaliation for his engaging in protected activity. Subsequently, on May 21, 1998, the ALJ approved a settlement agreement between the GWE and MK.

On January 27, 1999, a predecisional enforcement conference was held between MK and the NRC staff to discuss the apparent violation of the NRC's employee protection requirements (10 CFR 50.7). MK retained the services of a law firm to

perform an independent investigation. MK submitted the report of this investigation and additional materials to the NRC for review in support of its position that the removal of the GWE was based upon legitimate performance considerations and not upon the GWE having engaged in protected activity. While MK and SGT<sup>1</sup> do not agree that a violation of the Energy Reorganization Act, as amended, or the Commission's regulations occurred, in response to the DOL and OI findings, MK and SGT have agreed to take the actions as described in Section V of this Order.

#### III

MK, and its affiliate SGT, have agreed to take certain actions to assess the work environment at their corporate headquarters and temporary nuclear reactor and materials job sites. Specifically, MK and SGT have committed to conduct a comprehensive cultural assessment to be performed by an independent consultant and to utilize the results of such an assessment to improve their employee concerns program and to implement a mandatory continuing training program for all supervisors and managers. The training program will have the objectives of reinforcing the importance of maintaining a safety conscious work environment and of assisting managers and supervisors in responding to employees who raise safety concerns in the workplace. MK and SGT agreed to include in such training the requirements of 10 CFR 50.7, including, but not limited to, the definition of protected activity and discrimination, and appropriate responses to the raising of safety concerns by employees. MK and SGT also agreed that such training will be conducted by an independent trainer with expertise in employee concerns programs and employee protection requirements in the nuclear industry.

In addition, MK and SGT also have committed to taking the following corrective action to ensure that employees feel free to raise safety concerns without fear of retaliation: (1) posting this Confirmatory Order and the employee protection requirements of Section 211 of the Energy Reorganization Act, as amended, and NRC Form 3, at all MK and SGT temporary nuclear reactor and materials job sites and at the MK corporate headquarters in Cleveland, Ohio; (2) implementing the recommendations of the independent third party assessment

<sup>1</sup> Both MK and SGT employees were involved in the alleged discrimination against the MK Corporate Group Welding Engineer.
