

the dam. A separate Power Repayment Study (PRS) is prepared for each isolated project.

The existing rate schedule for the Sam Rayburn Dam Project was confirmed and approved on a final basis by the FERC on December 7, 1994, for the period October 1, 1994, through September 30, 1998. The rate was extended on an interim basis by the Deputy Secretary of Energy, who had authority at that time pursuant to Delegation Order 0204-108, for a one-year period, October 1, 1998, through September 30, 1999. The FY 1999 Sam Rayburn Dam Project PRS indicates the need for a rate adjustment of \$4,692 annually, or 0.2 percent.

Pursuant to implementing authority in 10 CFR 903.22(h) and 903.23(a)(3), the Secretary of Energy may extend a FERC-approved rate on an interim basis. The Southwestern Administrator, published notice in the **Federal Register** on June 29, 1999, 64 FR 34797, announcing a 30-day period for public review and comment concerning the proposed interim rate extension. In addition, an informal meeting was held with customer representatives in April 1999. Written comments were accepted through July 29, 1999. One comment was received. This comment stated no objection to the proposed interim extension.

Discussion

The existing Sam Rayburn Dam Project rate is based on the FY 1994 PRS. PRSs have been completed on the Sam Rayburn Dam Project each year since approval of the existing rates. Rate changes identified by the PRSs since that period have indicated the need for minimal rate increases or decreases. Since the revenue changes reflected by the PRSs were within the plus-or-minus two percent Rate Adjustment Threshold established by Southwestern's Administrator on June 23, 1987, these rate adjustments were deferred in the best interest of the government and provided for the next year's PRS to determine the appropriate level of revenues needed for the next rate period.

The FY 1999 PRS indicates the need for an annual revenue increase of \$4,692 (0.2 percent). As has been the case since the existing rate was approved, the FY 1999 rate adjustment falls within Southwestern's plus-or-minus two percent Rate Adjustment Threshold and would normally be deferred. However, the existing rate expires on September 30, 1999. Consequently, Southwestern proposes to extend the existing rate for a one-year period ending September 30, 2000, on an interim basis under the

implementation authorities noted in 10 CFR 903.22(h) and 903.23(a)(3).

Southwestern continues to make significant progress toward repayment of the Federal investment in the Sam Rayburn Dam Project. Through FY 1998, cumulative amortization for the Sam Rayburn Dam Project was \$12,339,699, which represents approximately 48 percent of the \$25,734,878 Federal investment for the Sam Rayburn Dam Project. The cumulative amortization has increased almost 34 percent since the existing rate was placed in effect.

Information regarding this rate extension, including studies and other supporting material, is available for public review and comment in the offices of Southwestern Power Administration, One West Third Street, Tulsa, Oklahoma 74101.

Order

In view of the foregoing and pursuant to the authority delegated to me in 10 CFR part 903, I hereby extend on an interim basis, for the period of one year, effective October 1, 1999, the current FERC-approved Sam Rayburn Dam Project rate for the sale of power.

Dated: September 15, 1999.

Bill Richardson,

Secretary.
