

or if EPA determines the permitting authority is not adequately administering its approved program (section 502(i)(4)). The activities to carry out these tasks are considered mandatory and necessary for implementation of title V and the proper operation of the operating permits program. This notice provides updated burden estimates from a previously approved ICR.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The projected cost for implementing the part 70 program for the 3 years from February 28, 2000 until February 28, 2003 are approximately 5 million annual burden hours at an annual cost of approximately 223 million dollars. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The burden hours break out to be just under 1.5 million hours for permitting authorities and just over 3.5 million hours for sources. The costs break out to be around 53 million dollars per year for permitting authorities and 170 million dollars per year for sources. During the period of this ICR, permitting authorities (in addition to general administration of the program) primarily will be issuing the remaining permits required by the program (just under 10,000), revising permits that have already been issued, renewing permits whose 5-year terms will expire, and reviewing semi-annual compliance monitoring reports for issued permits. Sources in the part 70 program primarily will be interacting with the permitting authority on permit issuance (for those that have not been issued), preparing semi-annual compliance monitoring reports, revising their permits as needed, carrying out periodic monitoring that was created as a result of the program, and preparing applications for permit renewal as necessary.
