SUPPLEMENTARY INFORMATION:

Title: Collection of Information for the ENERGY STAR Labeling Program Evaluation, EPA ICR No.1861.02. This is a new collection.

Abstract: This information collection is designed to evaluate the efficacy of the Energy Star Labeling Program as a nonregulatory strategy for preventing air pollution, per section 103 of the Clean

Air Act. The Energy Star Labeling Program was designed to create self-sustaining markets for energy efficient products and services via a common labeling strategy and awareness campaign and through strategic education for key market segments.

EPA plans to evaluate the program using ten voluntary data collection instruments targeted to key market segments. Nine of the data collection instruments will consist of telephone interviews that last between 12 to 15 minutes. One survey of household consumers will be mailed to respondents. In general all data collection instruments are designed to ascertain the respondents familiarity with the Energy Star label and to assess the degree to which long-term market effects or behavioral changes have occurred. The agency will use the information collected to evaluate program strategies, assess the overall efficacy of the labeling strategy and awareness campaign, and inform future program direction.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15. The **Federal Register** document required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 9/22/98; no comments were received.
