INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-860 (Preliminary)]

Tin- and Chromium-Coated Steel Sheet From Japan

Determination

On the basis of the record¹ developed in the subject investigation, the United States International Trade Commission determines,² pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a)), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports from Japan of tin- and chromium-coated steel sheet (as defined by the Department of Commerce (Commerce)), that are alleged to be sold in the United States at less than fair value (LTFV).

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigation. The Commission will issue a final phase notice of scheduling which will be published in the **Federal Register** as provided in section 207.21 of the Commission's rules upon notice from Commerce of an affirmative preliminary determination in the investigation under section 733(b) of the Act, or, if the preliminary determination is negative, upon notice of an affirmative final determination in that investigation under section 735(a) of the Act. Parties that filed entries of appearance in the

preliminary phase of the investigation need not enter a separate appearance for the final phase of the investigation. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation.

Background

On October 28, 1999, a petition was filed with the Commission and Commerce by Weirton Steel Corp., Weirton, WV; the United Steelworkers of America (USW), AFL-CIO; and the Independent Steelworkers Union (ISU), alleging that an industry in the United States is materially injured and threatened with material injury by reason of LTFV imports of tin- and chromium-coated steel sheet from Japan. Accordingly, effective October 28, 1999, the Commission instituted antidumping investigation No. 731-TA-860 (Preliminary).

Notice of the institution of the Commission's investigation and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of November 4, 1999 (64 FR 60225). The conference was held in Washington, DC, on November 18, 1999, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its determination in this investigation to the Secretary of Commerce on December 13, 1999. The views of the Commission are contained in USITC Publication 3264 (December 1999), entitled "Tin- and Chromium-Coated Steel Sheet from Japan: Investigation No. 731-TA-860 (Preliminary)."

By order of the Commission.

Issued: December 15, 1999.

ACTION: Institution of investigation.

EFFECTIVE DATE: December 13, 1999.

Background:

Article 19 of the General Agreement on Trade in Services (GATS) requires World Trade Organization (WTO) members to enter into successive negotiations beginning not later than January 1, 2000, with a view to achieving progressively higher levels of liberalization in services trade and investment. In preparing for such negotiations, the USTR has asked the Commission to develop a confidential database that provides up-to-date information on service markets in other WTO member countries. As requested by the USTR, the Commission, pursuant to section 332(g) of the Tariff Act of 1930, instituted an investigation for the purpose of developing a confidential database of information on trade and investment in 62 foreign service markets. The Commission will develop a database that provides, to the extent available, the following information with respect to six service industries:

(1) Current market access and national treatment restrictions to foreign service providers;

¹ The record is defined in sec. 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR § 207.2(f)).

² Commissioner Crawford not participating.

(2) Liberalization and deregulation that has taken place since 1995 (or since 1997 for financial services);

(3) Contemplated services liberalization or deregulation; and

(4) Sector-specific preferences extended to third-country trading partners.

The industries identified by USTR include health related and social services (defined as hospital, clinic, outpatient facility, nursing home, assisted living services, but excluding such services when publicly provided); education and training services (defined as higher education services, adult education services, and other education services, and training services in traditional and non-traditional settings, but excluding such services when publicly provided); travel and tourism services (defined as lodging, food serving services including restaurants, travel agency, tour operator, and tourist guide services); insurance services (defined as direct insurance and co-insurance, including life and non-life insurance services; reinsurance and retrocession; insurance intermediation, such as brokerage and agency; and services auxiliary to insurance including consultancy, actuarial, risk assessment and claim settlement); banking, securities, and other financial services (defined as deposit taking, lending, leasing, payment and transmission services, trading of securities and all other financial assets, securities underwriting and related services, asset management, clearance and settlement, and financial information and advisory services); and computer and related services (defined as data processing services, database services, software implementation services, and consultancy services related to the installation and maintenance of computer hardware and software). In addition, the Commission will attempt to identify common approaches, if any, to the deregulation and liberalization of service markets among WTO members. The USTR requested that the Commission provide the database no later than May 26, 2000. USTR indicated that the database will be confidential for a period of 10 years. USTR also noted that it considers the Commission's database to be an interagency memorandum that will contain predecisional advice and be subject to the deliberative process privilege. This investigation follows a previous request for a confidential database (Inv. No. 332-397) that was provided to the USTR on April 30, 1999. That database focused on distribution services (defined as wholesaling, retailing, and franchising),

telecommunication services, express delivery services, entertainment technology services, foreign legal consultancy services, accounting services, architectural services, engineering services, construction services, energy services (defined as mining, oil, gas, and electricity), and environmental services. The Commission also provided information with respect to temporary entry and stay of service providers. In addition, the Commission sought to identify, to the extent available, common approaches to the deregulation and liberalization of service markets among WTO members, and best prospects for services trade liberalization during the impending WTO negotiations.

By order of the Commission.

Issued: December 14, 1999.
