5. Who will be required or asked to report: Power reactor facility licensees.

6. An estimate of the number of responses: 66.

7. The estimated number of annual respondents: 33.

Abstract: NRC is amending its previously published (62 FR 42426) proposed rule, 10 CFR 55, "Initial Licensed Operator Examination Requirements," to add additional information collection requirements and is publishing the revised document as a final rule. The new information collection requirements will require power reactor facility licensees to establish, implement, and maintain procedures to control examination security and integrity if they elect to prepare their own licensing examinations.

Submit, by (insert date 30 days after publication in the **Federal Register**), comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
