*Estimated Time Per Response:* 6 hours.

*Total Annual Burden:* 36,000 hours.

*Total Annual Cost:* N/A.

*Needs and Uses:* A Report and Order (R&O) considering the proposals made in the Notice of Proposed Rulemaking (NPRM) was adopted by the Commission in January 1999. The R&O made certain revisions to the burdens approved in the NPRM, chiefly to make them as effective as possible with minimum negative impact on telecommunications carriers.

The R&O requires that telecommunications carriers: establish and submit to the Commission their policies and procedures for ensuring that any interception of communications or access to call-identifying information effected within its switching premises can be activated only in accordance with lawful authorization and with the affirmative intervention of an individual officer or employee of the carrier, acting in accordance with regulations prescribed by the Commission. This submission must include information regarding the appointment of any individual whose job function will include being a point of contact for law enforcement to reach on a daily, around-the-clock basis, including a description of that individual's job function and a method of contacting that individual. The Commission did not adopt a proposal contained in the NPRM to establish less burdensome filing requirements for submission of policies and procedures by smaller carriers, finding that CALEA does not make a distinction between

carriers based on size, for the purpose of determining who must submit their policies and procedures to the Commission. The Commission must review carriers' policies and procedures to determine whether they are in compliance with the rules established in CALEA. If the Commission determines that any carrier's policies and procedures are non-compliant, the carrier shall modify its policies and procedures accordingly.

The R&O also established certification and recordkeeping requirements covering each interception of communications or access to call-identifying information, made with or without appropriate authorization. The certification requirement could be met by having the designated company liaison sign the certification statement, verifying that the records are complete and accurate, and attaching the appropriate legal authorization, as well as any extensions that have been granted. The R&O adopted a two-tiered recordkeeping requirement. It mandated that telecommunications carriers maintain records of call-identifying information and unauthorized interceptions for ten years; it required carriers to maintain records relating to the content of each authorized interception of communications for a period of time determined by them in accordance with the policies and procedures that they establish under section 229(b) of the Communications Act and applicable state and federal statutes of limitation. The R&O then required that carriers include in their policies and procedures, submitted to the Commission for review, a detailed description of how long they will maintain their record of interception, and reasonable justification for the time period that carriers choose for their individual record retention. The R&O noted that the Commission retains authority to modify any carrier's policy or procedure that is determined not to be in compliance with these regulations.

The Order revises the recordkeeping obligations adopted in the R&O by finding that carriers need not retain the content or call-identifying information of any interceptions of communications. Thus, it replaces the requirement that carriers maintain records of unauthorized interceptions for ten years with one that allow the carriers to maintain the certification, as is the case with authorized interceptions, for a "reasonable period of time".

The Office of Management and Budget (OMB) approved the revised information collection burdens in the R&O and the Order on 2/2/00. This temporary approval expires at the end of
