

Mexico v. El Paso Electric Company; Sierra Pacific Power Company; California Independent System Operator Corporation; California Independent System Operator Corporation; El Segundo Power, LLC; Southwest Reserve Sharing Group; Montana Power Company; Pacific Gas and Electric Company; San Diego Gas & Electric Company v. Public Service Company of New Mexico; and Pacific Gas & Electric Company.

On December 20, 1999, the Commission issued Order No. 2000 to advance the formation of Regional Transmission Organizations (RTOs). Order No. 2000 announced the initiation of a regional collaborative process to aid in the formation of RTOs. To initiate the collaborative process, the Commission organized a series of regional workshops. These workshops are open to all interested parties. The third workshop is scheduled for March 23–24, 2000 in Las Vegas, Nevada. During the course of the Las Vegas workshop, discussion of the above-listed cases could arise. Any person having an interest in an above-listed case is invited to attend the Las Vegas workshop. There will be no Commission transcript of any of the workshops, and information discussed or disseminated in the workshop will not constitute part of the decisional record in the above-listed cases, unless formally filed in accordance with Commission regulations.

David P. Boergers,
Secretary.

Agency Information Collection Activities: Submission for OMB Review; Comment Request, National Emissions Standards for Hazardous Air Pollutants (NESHAP) for Aerospace Manufacturing and Rework Facilities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the following Information Collection Request (ICR) has been forwarded to the Office of Management and Budget (OMB) for review and approval: NESHAP Subpart GG: Aerospace Manufacturing and Rework Facilities, OMB Control Number 2060–0314, expiration date March 31, 2000.

The ICR describes the nature of the information collection and its expected burden and cost; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before April 19, 2000.

FOR FURTHER INFORMATION CONTACT: For a copy of the ICR contact Sandy Farmer at EPA by phone at (202) 260–2740, by E-Mail at Farmer.Sandy@epamail.epa.gov or download off the Internet at <http://www.epa.gov/icr> and refer to EPA ICR No. 1687.05. For technical questions about the ICR contact Anthony Raia at (202) 564–6045.

SUPPLEMENTARY INFORMATION:

Title: NESHAP for Aerospace Manufacturing and Rework Facilities (OMB Control No. 2060–0314, EPA ICR No. 1687.05) expiring 3/31/00. This is a request for an extension of a currently approved collection.

Abstract: The information collection includes initial, semiannual and annual reports, and periodic record keeping necessary for the EPA to ensure compliance with the National Emission Standards for Hazardous Air Pollutants for Aerospace Manufacturing and Rework. Respondents are owners or operators of new and existing aerospace manufacturing and rework facilities that are in operation after promulgation of the NESHAP.

In addition to the initial notification and notification of compliance status required by the General Provisions to 40 CFR part 63 (subpart A), the final rule requires semiannual and annual reports. The final rule also requires that the results of any performance test required under section 63.7 of the General Provisions be reported no later than 30 days after the completion of the test. A permit application as required under title V of the Act may be used in lieu of the initial notification provided the same information is contained in the permit application as required for the initial notification.

The General Provisions, 40 CFR 63.9 and 63.10, identify the type of information to be included in the initial notification, notification of compliance status, and other reports. The emissions test reports and other records must be kept at the facility for a minimum of 5 years and be made available to the Administrator upon request. The respondent's State or local agency can be delegated as the enforcement authority by the EPA and may also request these reports. The information is used to determine that all sources subject to the NESHAP are achieving the standards. The final rule adopts the

general record keeping and reporting requirements contained in sections 63.7 through 63.10 of 40 CFR part 63 and does not contain any conflicting requirements with section 63.10.

For each cleaning solvent used for aerospace cleaning operations at the facility, the final rule will require a record of the name of the cleaning solvent and documentation that shows the organic HAP constituents of the solvent. For each cleaning solvent used in hand-wipe aerospace cleaning operations that does not conform to the composition requirements, but does conform to the vapor pressure requirement, the information required to be recorded is the name of the aerospace cleaning solvent, the monthly usage of the cleaning solvent at each aerospace operation, the composite vapor pressure, the manufacturer's data sheets or other documentation of the vapor pressure, and any test reports and calculations performed to determine the composite vapor pressure. For each aerospace cleaning solvent that conforms to the composition requirements, the records that are required to be maintained are the name of the aerospace cleaning solvent, documentation demonstrating compliance with the composition requirements, and annual purchase records showing the annual volume purchased.

For aerospace cleaning solvents that do not conform to either the composition or vapor pressure requirements and are used for the exempt cleaning operations, monthly records must be maintained of the name and volume of each cleaning solvent and the processes where these solvents were utilized. In addition, a record must be kept of all leaks from spray gun cleaners, including source identification, the date that the leak was discovered, and the date that the leak was repaired.

The notification of compliance status will include an identification of each aerospace cleaning solvent used at the facility, a description of the procedures to be used to ensure that bags and containers are kept closed when not in use and that cleaning solvents are stored in closed containers, the name of each cleaning solvent that does not conform to the approved composition list, and the vapor pressure test results of each.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The **Federal Register** document

required under 5 CFR 1320.8(d), soliciting comments on this collection of information was published on 07/31/1998, one comment was received and evaluated.

Burden Statement: The annual public reporting and record keeping burden for this collection of information is estimated to average 52 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: Owners and operators of aerospace manufacturing or rework facilities.

Estimated Number of Respondents: 16,402.

Frequency of Response: start-up, and semi-annual.

Estimated Total Annual Hour Burden: 856,437 hours.

Estimated Total Annualized Cost Burden: \$561,000.

Send comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques to the following addresses. Please refer to EPA ICR No 1687.05 and OMB Control No. 2060-0314 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Office of Environmental Information, Collection Strategies Division (2822), 1200 Pennsylvania Ave., NW, Washington, DC 20460; and
Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW, Washington, DC 20503

Dated: March 13, 2000.

Oscar Morales,

Director, Collection Strategies Division.

Prevention of Significant Deterioration of Air Quality (PSD) Final Determination; Indiana

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The purpose of this document is to announce that on September 8, 1999, the Environmental Protection Agency's Environmental Appeals Board (EAB) dismissed two appeals of a permit issued to the ConAgra Soybean Processing Company by the Indiana Department of Environmental Management (IDEM) pursuant to the Prevention of Significant Deterioration of Air Quality (PSD) regulations in the Clean Air Act, as administered by the State of Indiana.

DATES: The effective date of EAB's decision denying review is September 8, 1999.

ADDRESSES: The documents relevant to the above action are available for public inspection during normal business hours at the following address: Environmental Protection Agency, Region 5, 77 West Jackson Boulevard (AR-18J), Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Pallavi Reddy, United States Environmental Protection Agency, Region 5, 77 W. Jackson Blvd. (AR-18J), Chicago, Illinois 60604, (312) 886-6204.

SUPPLEMENTARY INFORMATION: On August 14, 1998, the IDEM issued construction permit number CP-129-8541-0039 under the PSD requirements of the Clean Air Act of 1990 to ConAgra Soybean Processing Company for the construction of a new soybean processing plant in Posey County, Indiana. On September 14, 1998, two separate entities, Valley Watch Inc., a non-profit environmental group, and Consolidated Grain and Barge Company filed petitions for review of this permit with the EPA's EAB (PSD Appeal Nos. 98-27 & 98-28). The petitioners alleged that: (1) IDEM improperly issued ConAgra's permit because the permit fails to demonstrate that the proposed facility will not cause or contribute to an exceedance of the National Ambient Air Quality Standard for ozone as required by the Act; (2) the permit fails to satisfy the requirements for pre-construction monitoring for PM-10; (3) IDEM improperly issued the permit because the increment consumption analysis for PM-10 does not comply with the requirements of 40 CFR

52.21(c), (k), and (m); and (4) the additional impacts analysis of the proposed project on economic growth, soils, vegetation, and visibility required by 40 CFR 52.21(o) was inadequate.

On October 18, 1999, the EAB denied the petitioners' request for review. The petitioners failed to prove that the permit or permit condition was based on a finding of fact or conclusion of law that was clearly erroneous, or to demonstrate that there was an exercise of discretion or important policy consideration warranting the EAB's discretionary review, as required by 40 CFR 124.19(a). The EAB also ordered IDEM to revise Condition 38 of the permit, which relates to emissions offsets, to strike reference to Federal law and specifically, 40 CFR 52.21(k).

Authority: 42 U.S.C. 7401 *et seq.*

Dated: March 9, 2000.

David A. Ullrich,

Acting Regional Administrator, Region 5.

Workshop on Information Needs To Address Children's Cancer Risk

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The EPA's Office of Research and Development and the National Institutes of Health's National Institute of Environmental Health Sciences (NIEHS) are co-sponsoring a workshop entitled, "Information Needs to Address Children's Cancer Risk." The main focus of the workshop is to discuss children's cancer risk assessment and related data needs to address issues that have arisen during public review of the Agency's 1999 Draft Revised Guidelines for Carcinogen Risk Assessment. These issues include: characterizing the ideal data set to adequately address children's cancer risk, and proposed approaches to using available data in the absence of the ideal data set. Invited participants represent the pediatric, toxicologic, and risk assessment communities and are leaders in the area of human health testing, research, and assessment.

DATES: The workshop will begin on Thursday, March 30, 2000, at 7:00 p.m. and end on Friday, March 31, 2000, at 4:30 p.m. There will be space available for observers on a first-come, first-served basis.
