

mph between Buffalo and Gowanda, New York. They also state that all locomotives are equipped with shatterproof type safety glazing and have never experienced any problems with window breakage or vandalism.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (e.g., Waiver Petition Docket Number 1999-6069) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, SW, Washington, DC 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at <http://dms.dot.gov>.

Issued in Washington, D.C. on April 4, 2000.

Grady C. Cothen, Jr.,

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 of the Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

National Railroad Passenger Corporation

[Docket No. FRA-2000-7199]

The National Railroad Passenger Corporation (Amtrak) seeks a temporary waiver of compliance with section 203 of FRA's Passenger Equipment Safety Standards (49 CFR part 238). On October 18, 1999, Amtrak, pursuant to 49 CFR 238.203, filed a "grandfathering" petition with FRA (Docket No. FRA-1999-6404), in which it requested approval to continue using five trainsets manufactured by Talgo, Inc. in the Pacific Northwest that do not meet the buff strength standards specified in Part 238. Section 203 of that part provides that use of non-compliant equipment subject to a grandfathering petition must cease on May 8, 2000, unless FRA has approved the petition by that date.

Amtrak, in its petition for waiver, states that it believes there is a significant risk that FRA, will be unable to resolve administrative issues concerning information in the docket, obtain final comments from all interested parties, and then perform its own internal analysis and issue a final decision by May 8, 2000. Amtrak further states that "in order to ensure there is no short term [service] disruption, Amtrak feels that it is essential that FRA extend the period during which operation of Talgo equipment is permissible beyond the current May 8, 2000 date, until a date that is 30 days after the date on which FRA acts finally on Amtrak's grandfathering petition."

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with this proceeding since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA's Docket Clerk at Federal Railroad Administration, Office of Chief Counsel, 1120 Vermont Avenue, MS 10, Washington, DC, 20590, in writing, by April 20, 2000 and specify the basis for their request.

All other communications concerning this proceeding should identify the appropriate docket number (e.g. Docket No. FRA-2000-7199) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL-40-1 (Plaza Level), 400 7th Street, SW, Washington, DC 20590.

Communications received by April 26, 2000 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written

communications concerning this proceeding are available for examination during regular business hours (9:00 am-5:00 pm) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at <http://dms.dot.gov>.

Issued in Washington, DC on April 6, 2000.

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Union Pacific Railroad Company (Docket Number FRA-1999-5755)

Union Pacific Railroad Company (UP) seeks a permanent waiver of compliance from certain provisions of the Power Brakes and Drawbars regulations, 49 CFR part 232, at Proviso Yard in Chicago, Illinois. Specifically, UP requests relief from the requirements of 49 CFR 232.12(i)(1), which requires that when a train airbrake system is tested from a yard test plant, the air source must be connected to the end of the train which will be nearest to the hauling road locomotive.

UP provides the following information to justify this request. At Proviso Yard, trains are regularly made up and depart from Yard Four. The tracks in Yard Four hold approximately 60 cars. Most trains consist of one hundred or more cars, which requires a double or triple over be made to make up an outbound train. The standard procedure is to fill one or more tracks with the head end portion and set the rear end portion as a rear end fill in an adjacent track. When this rear end fill is short (thirty cars or less), it presents an operational and safety problem. Yard air is at the extreme ends of Yard Four. If the rear fill is set at the end of the yard where hauling locomotives are attached,

it requires the carman to either walk thirty car lengths or more to apply the end-of-train device (EOT) or cross several tracks with the EOT in order to install the device to the rear of the train. Either alternative presents both a safety factor for the carman and a time factor for completing the air test, since there are no access roads for the carmen to use.

Based on the above, UP believes that a permanent waiver permitting the yard air source to be applied to the rear end fill at Proviso's Yard Four would improve the safety and efficiency of operations without any adverse effect on safety.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number 1999-5755) and must be submitted to the Docket Clerk, DOT Docket Management Facility, Room PL-401 (Plaza Level), 400 7th Street, S.W., Washington, D.C. 20590. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) at the above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's web site at <http://dms.dot.gov>.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

Announcing the First Quarterly Meeting of the Crash Injury Research and Engineering Network

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Meeting Announcement.

SUMMARY: This notice announces the First Quarterly Meeting of members of the Crash Injury Research and Engineering Network. CIREN is a collaborative effort to conduct research on crashes and injuries at eight Level 1 Trauma Centers which are linked by a computer network. Researchers can review data and share expertise, which could lead to a better understanding of crash injury mechanisms and the design of safer vehicles.

DATE AND TIME: The meeting is scheduled from 8:30 a.m. to 5:00 p.m. on May 5, 2000.

ADDRESSES: The meeting will be held in Room 6200-04 of the U.S. Department of Transportation Building, which is located at 400 Seventh Street, SW, Washington, DC.

SUPPLEMENTARY INFORMATION: The CIREN System has been established and crash cases have been entered into the database by each Center. NHTSA has held three Annual Conferences (two in Detroit and one in conjunction with STAPP in San Diego) where CIREN research results were presented. Further information about the three previous CIREN conferences is available through the NHTSA website at: http://www-nrd.nhtsa.dot.gov/bio_and_trauma/ciren-final.htm.

NHTSA plans to begin holding quarterly meetings on a regular basis to disseminate this information to interested parties. This is the first such meeting. The topic for this meeting is lower extremity injuries in motor vehicle crashes. Subsequent meetings have tentatively been scheduled for July and October. These quarterly meetings will be in lieu of an annual CIREN conference.

FOR FURTHER INFORMATION CONTACT: Mrs. Donna Stemski, Office of Human-Centered Research, 400 Seventh Street, SW, Room 6220, Washington, DC 20590, telephone: (202) 366-5662.

Issued on: April 5, 2000.

Joseph N. Kanianthra,

Acting Associate Administrator for Research and Development, National Highway Traffic Safety Administration.

National Highway Traffic Safety Administration

[Docket No. NHTSA-2000-7112]

Notice of Receipt of Petition for Decision That Nonconforming 1987-1989 Bentley Passenger Cars Are Eligible for Importation

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Notice of receipt of petition for decision that nonconforming 1987-1989 Bentley passenger cars are eligible for importation.

SUMMARY: This document announces receipt by the National Highway Traffic Safety Administration (NHTSA) of a petition for a decision that 1987-1989 Bentley passenger cars that were not originally manufactured to comply with all applicable Federal motor vehicle safety standards are eligible for importation into the United States because (1) they are substantially similar to vehicles that were originally manufactured for importation into and sale in the United States and that were certified by their manufacturer as complying with the safety standards, and (2) they are capable of being readily altered to conform to the standards.

DATES: The closing date for comments on the petition is May 11, 2000.

ADDRESSES: Comments should refer to the docket number and notice number, and be submitted to: Docket Management, Room PL-401, 400 Seventh St., SW, Washington, DC 20590. [Docket hours are from 9 am to 5 pm]

FOR FURTHER INFORMATION CONTACT: George Entwistle, Office of Vehicle Safety Compliance, NHTSA (202-366-5306).

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 30141(a)(1)(A), a motor vehicle that was not originally manufactured to conform to all applicable Federal motor vehicle safety standards shall be refused admission into the United States unless NHTSA has decided that the motor vehicle is substantially similar to a motor vehicle
