[Airspace Docket No. 00-AGL-03]

**Modification of Class D Airspace; Rapid City, SD; Modification of Class D Airspace; Rapid City Ellsworth AFB, SD; and Modification of Class E Airspace; Rapid City, SD**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action modifies Class D airspace at Rapid City, SD, modifies Class D airspace at Ellsworth AFB, SD, and modifies Class E airspace at Rapid City, SD. An Area Navigation (RNAV) Standard Instrument Approach Procedure (SIAP) to Runway (Rwy) 32 has been developed for Rapid City Regional Airport. Controlled airspace extending upward from the surface of the earth is needed to contain aircraft executing this approach. This action increases the radius of the existing Class D and Class E airspace for Rapid City Regional Airport, and modifies the legal description of the Class D airspace for Ellsworth AFB to include the formentioned modification.

**EFFECTIVE DATE:** 0901 UTC, August 10, 2000.

**FOR FURTHER INFORMATION CONTACT:** Denis C. Burke, Air Traffic Division, Airspace Branch, AGL-520, Federal Aviation Administration, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone (847) 294-7568.

**SUPPLEMENTARY INFORMATION:****History**

On Friday, February 18, 2000, the FAA proposed to amend 14 CFR part 71 to modify Class D airspace and Class E airspace at Rapid City, SD, and modify Class D airspace at Rapid City, Ellsworth AFB, SD (65 FR 8321). The proposal was to modify controlled airspace extending upward from the surface to contain Instrument Flight Rules (IFR) operations in controlled airspace during portions of the terminal operation and while transiting between the enroute and terminal environments. Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class D airspace designations are published in paragraph 5000, Class E airspace areas designated as extensions to a Class D airspace area

are published in paragraph 6004, and Class E airspace designated as surface areas are published in paragraph 6002, of FAA Order 7400.9G dated September 1, 1999, and effective September 16, 1999, which is incorporated by reference in 14 CFR 71.1. The Class D airspace designations and Class E airspace designations listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to 14 CFR part 71 modifies Class D airspace and Class E airspace at Rapid City, SD, and Modifies Class D airspace at Rapid City, Ellsworth AFB, SD, to accommodate aircraft executing instrument flight procedures into and out Rapid City Regional Airport and Ellsworth AFB. The area will be depicted on appropriate aeronautical charts.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) Is not a “significant regulatory action” under Executive Order 12866; is not a significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.
