SUPPLEMENTARY INFORMATION:

Section 303(d) of the Clean Water Act requires States, Territories, and authorized Tribes to identify and rank waters which do not meet water quality standards following implementation of technology-based controls. Under section 303(d), States, Territories, and authorized Tribes are also required to establish total maximum daily loads (TMDLs) for listed waters not meeting standards as a result of pollutant discharges. In developing the section 303(d) lists, States, Territories, and authorized Tribes are required to consider various sources of water-quality related data and information, including the section 305(b) water quality reports. The section 305(b) reports contain information on the extent of water quality degradation, the pollutants and sources affecting water quality, and progress in controlling water pollution.

The Clean Water Act requires EPA to review and approve or disapprove section 303(d) lists and TMDLs. Currently, there are 56 respondents (the 50 States, the District of Columbia, and the five Territories). Section 303(d) specifically requires States, Territories, and authorized Tribes to develop lists and TMDLs "from time to time" and EPA to review and approve or disapprove the lists and the TMDLs. EPA collects section 305(b) reports from 59 respondents (the 50 States, the District of Columbia, five Territories, and 3 River Basin commissions).

The Office of Management and Budget (OMB) previously approved information collection authority for the submission of section 305(b) reports under 40 CFR 130.10(a) of the EPA Water Quality Management Standards under OMB Number 2040-0071. In 1992, OMB approved an addendum to this ICR clarifying the burden associated with preparing section 303(d) lists of waters for inclusion in the section 305(b) reports. OMB reapproved the ICR for the period 1993-1995, 1996-1998, and then again from March 1999-April 2003 (ICR Number 1560.05, approved April 5, 2000).
