**DEPARTMENT OF TRANSPORTATION**

**National Highway Traffic Safety Administration**

[Docket No. NHTSA-99-6586; Notice 02]

RIN 2127-AH76

**Final Theft Data; Motor Vehicle Theft Prevention Standard**

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Publication of final theft data.

**SUMMARY:** This document publishes the final data on thefts of model year (MY) 1998 passenger motor vehicles that occurred in calendar year (CY) 1998. The final 1998 theft data indicate a decrease in the vehicle theft rate when compared to the theft rate experienced in CY/MY 1997. The final theft rate for MY 1998 passenger vehicles stolen in calendar year 1998 (2.53 thefts per thousand vehicles produced) decreased by 17.05 percent from the theft rate for CY/MY 1997 vehicles (3.05 thefts per thousand vehicles produced). Publication of these data fulfills NHTSA's statutory obligation to periodically obtain accurate and timely theft data and publish the information for review and comment.

**FOR FURTHER INFORMATION CONTACT:** Ms. Rosalind Proctor, Office of Planning and Consumer Programs, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Proctor's telephone number is (202) 366-0846. Her fax number is (202) 493-2290.

**SUPPLEMENTARY INFORMATION:** NHTSA administers a program for reducing motor vehicle theft. The central feature of this program is the Federal Motor Vehicle Theft Prevention Standard, 49 CFR Part 541. The standard specifies performance requirements for inscribing and affixing vehicle identification numbers (VINs) onto certain major

original equipment and replacement parts of high-theft lines of passenger motor vehicles.

The agency is required by 49 U.S.C. 33104(b)(4) to periodically obtain, from the most reliable source, accurate and timely theft data and publish the data for review and comment. To fulfill this statutory mandate, NHTSA has published theft data annually beginning with MYs 1983/84. Continuing to fulfill the § 33104(b)(4) mandate, this document reports the final theft data for CY 1998, the most recent calendar year for which data are available.

In calculating the 1998 theft rates, NHTSA followed the same procedures it used in calculating the MY 1997 theft rates. (For 1997 theft data calculations, see 64 FR 41183, July 29, 1999.) As in all previous reports, NHTSA's data were based on information provided to NHTSA by the National Crime Information Center (NCIC) of the Federal Bureau of Investigation. The NCIC is a government system that receives vehicle theft information from nearly 23,000 criminal justice agencies and other law enforcement authorities throughout the United States. The NCIC data also include reported thefts of self-insured and uninsured vehicles, not all of which are reported to other data sources.

The 1998 theft rate for each vehicle line was calculated by dividing the number of reported thefts of MY 1998 vehicles of that line stolen during calendar year 1998 by the total number of vehicles in that line manufactured for MY 1998, as reported to the Environmental Protection Agency (EPA).

The final 1998 theft data show a decrease in the vehicle theft rate when compared to the theft rate experienced in CY/MY 1997. The final theft rate for MY 1998 passenger vehicles stolen in CY 1998 decreased to 2.53 thefts per thousand vehicles produced, a decrease of 17.05 percent from the rate of 3.05 thefts per thousand vehicles experienced by MY 1997 vehicles in CY 1997. For MY 1998 vehicles, out of a total of 196 vehicle lines, 41 lines had a theft rate higher than 3.5826 per thousand vehicles, the established median theft rate for MYs 1990/1991. (See 59 FR 12400, March 16, 1994.) Of

the 41 vehicle lines with a theft rate higher than 3.5826, 35 are passenger car lines, 6 are multipurpose passenger vehicle lines, and none are light-duty truck lines.

On Tuesday, February 8, 2000, NHTSA published the preliminary theft rates for CY 1998 passenger motor vehicles in the **Federal Register** (65 FR 6250). The agency tentatively ranked each of the MY 1998 vehicle lines in descending order of theft rate. The public was requested to comment on the accuracy of the data and to provide final production figures for individual vehicle lines. The agency received written comments from General Motors Corporation (GM) and Volkswagen of America, Inc. (VW). The agency used all written comments to make the necessary adjustments to its data. As a result of the adjustments, some of the final theft rates and rankings of vehicle lines changed from those published in the February 2000 notice. In its comments, Volkswagen informed the agency that the production volume for the Audi A4 vehicle line was incorrect. In response to this comment, the production volume for the Audi A4 has been corrected and the final theft list has been revised accordingly. As a result of the correction, the Audi A4 previously ranked No. 163 with a theft rate of 0.8669 is now ranked No. 168 with a theft rate of 0.7147.

GM informed the agency that the production volumes for the Chevrolet Metro and Chevrolet Tracker were incorrect. Upon further review of the production volumes, it was later confirmed by GM that the volumes listed by the agency for the two lines were not in error. Therefore, the production volume and the theft rate for the Chevrolet Metro and Chevrolet Tracker vehicle lines will remain unchanged.

The following list represents NHTSA's final calculation of theft rates for all 1998 passenger motor vehicle lines. This list is intended to inform the public of calendar year 1998 motor vehicle thefts of model year 1998 vehicles and does not have any effect on the obligations of regulated parties under 49 U.S.C. Chapter 331, Theft Prevention.
